Our Mission

The mission of the School of Health Technology and Management is to provide the highest quality education in a multidisciplinary learning environment that fosters research, scholarly activity, critical thinking, evidence–based practice, leadership, and professionalism, while affirming the importance of ethical behavior, human diversity, service, and a team approach to health care. To achieve this, the School endeavors to:

- promote patient health and well being by teaching the knowledge, attitudes, and skills needed to ensure excellence in practice;
- encourage innovative and responsible methods of managing and delivering high quality, cost-effective, accessible health care;
- respond to current and emerging public health challenges both locally and globally; and
- cultivate partnerships among faculty, staff, students, and communities.

Occupational Therapy

Occupational Therapy helps people live life to its fullest. It does this by helping people of all ages who have suffered an illness, injury or some form of debilitation relearn the skills of daily living. By focusing on the physical, psychological and social needs of its patients, OT helps people function at the highest possible level, concentrating on what’s important to them to rebuild their health, independence and self-esteem.

Occupational therapists are specially trained and credentialed in the field and rely on evidence-based best practices and science-driven data to constantly improve patient outcomes. In an era where consumers want to increasingly be empowered and maximize life’s potential, more and more people are recognizing the value of occupational therapy and as a result the field is expected to grow significantly over the coming years.

AOTA, 2008
**Occupational Therapy Program**

**Leading to a MSOT Degree**

**Eva Rodriguez, PhD, OTR/L**
Department Chairperson

The Occupational Therapy program is a graduate, three-year program, accredited by the Accreditation Council for Occupational Therapy Education (ACOTE)* of the American Occupational Therapy Association (AOTA). Applicants must have a Bachelor’s Degree in addition to the prerequisite coursework and must submit their results of the GRE as part of the application process. Upon successful completion of the program, Graduates receive a Master's of Sciences in Occupational Therapy (NBCOT).

Occupational Therapy graduates will be able to sit for the national certification examination for occupational therapists administered by the National Board for Certification in Occupational Therapy (NBCOT).

After successful completion of this exam, an individual will be a registered Occupational Therapist (OTR). Most states require licensure in order to practice, however, state licenses are usually based on the results of the NBCOT certification examination.

**Why Stony Brook’s Occupational Therapy Program?**
- Affordable tuition
- Individualized faculty advisement
- Wide availability of clinical sites for fieldwork
- Opportunities to collaborate with faculty in research
- High pass rate on the NBCOT exam
- Small class size
- Diverse faculty expertise
