HAS 531  Healthcare Delivery Systems
This course is designed to provide an overview of the health care delivery enterprise in the United States and to provide students with an understanding of the various forces which shape this enterprise. The course also includes cases studies in health care and how they have shaped the United States health care system. The dynamics of care, evolving public and private regulations and guidelines, and rapid technological advances will be discussed.
HAS 531 is a REQUIRED course for students enrolled in these master’s concentrations: Health Care Management or Health Policy
It is also a REQUIRED course for students enrolled in the Advanced Certificate Health Care Quality Management specialization.

HAS 534  Fundamentals of Health Care Management
This course provides an overview of managing health care in a changing environment. The course reviews areas such as, external and internal environments, planning, organizing, implementing and evaluating services, leadership, organization change, and social responsibility.
HAS 534 is a REQUIRED course for students enrolled in this master’s concentration: Health Care Management. It is also a REQUIRED course for students enrolled in the Advanced Certificate Health Care Quality Management specialization.

HAS 545  Ethics and Health Care
This course, designed for health care professionals (providers, educators, and managers), provides an overview of the ethics of health care in a rapidly changing society. Students learn how to approach ethical dilemmas using theoretical frameworks and decision-making processes. Ethical issues surrounding health care reform and public health policy, including distribution of resources and rationing of services, are explored. Through the use of case studies, students are introduced to other health topics, such as euthanasia, reproduction, transplants, and HIV/AIDS, from an ethical perspective. The course also includes a review of classic cases in health care ethics and how they have shaped health policy, an overview of patient education and ethics, and a discussion on the professional codes of ethics and standards. Not for credit in addition to HAP 545 or HAY 545.
HAS 545 is an ELECTIVE course for students enrolled in these master’s concentrations: Health Care Management or Health Policy

HAS 570  Business Aspects of Managed Care
The course is designed to introduce the student to and expand on their knowledge base, as it relates to the business and financial aspects of the Managed Care delivery system. Trends in the financing of health care will be explored, as well as the practical application of developing and writing a formal business plan. Prerequisites: HAS 554.
HAS 570 is an ELECTIVE course for students enrolled in this master’s concentration: Health Care Management.

HAS 578  Leadership in Health Care
The organization of the future requires more than traditional management to remain successful and competitive in our rapidly changing world. This course will focus on the future role of the leader in the emerging society of organizations, while drawing on lessons learned from the past, in both theory and practice. The impact of leadership on the future quality of our lives, our businesses, our learning institutions and society in general, will be examined. Students will learn from first hand accounts the leaders’ experiences and the different challenges facing private, public and non-profit organizations. The difference between management skills and leadership skills will be defined as well as strategies for balancing and developing each skill set.
HAS 578 is an ELECTIVE course for students enrolled in this master’s concentration: Health Care Management.

Students in the Advanced Certificate Program:
In order to be able to transfer all 18 credits from the Advanced Certificate to a management concentration in the Master of Science in Health Care Policy and Management, students in the Advanced Certificate should take at least one of the courses listed below. Please speak to your advisor before enrolling.
HAS 531 Healthcare Delivery Systems
HAS 533 Communications and Group Dynamics (see fall schedule)
HAS 534 Fundamentals of Health Care Management
HAS 538 Health Economics and Public Policy (see fall schedule)
