UNIVERSITY STATEMENTS

P105: EQUAL OPPORTUNITY AND AFFIRMATIVE ACTION POLICY (March 2019)

This policy has been written in compliance with Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, the Division of Human Rights Law of New York State, SUNY Policy 6502: Equal Opportunity, Employment and Fair Treatment in the State of New York and the SUNY Research Foundation Policy on Equal Employment Opportunity. Stony Brook University has a longstanding commitment to equal employment and educational opportunity, and environments that ensure that everyone in the Stony Brook University community is treated with respect, dignity, fairness, and equity. This policy applies to all University students and employees, as well as individuals outside the University Community, including but not limited to guests, visitors, vendors, and volunteers.

Stony Brook University prohibits discrimination on the basis of race, sex, sexual orientation, gender identity or expression, religion, age, color, creed, national or ethnic origin, disability, marital status, familial status, pregnancy, genetic predisposition, criminal convictions, domestic violence victim status, and veteran or military status and all other protected classes under federal or state laws in the administration of its policies, programs, activities or other Stony Brook University administered programs or employment, and includes the terms, conditions, and privileges of employment and/or access for students, faculty and staff. Stony Brook University’s non-discrimination policy affects all employment practices including, but not limited to, recruiting, hiring, transfers, promotions, benefits, compensation, training, educational opportunities, discipline, daily responsibilities and terminations.

Retaliation against an employee, student or any witness who reports discrimination and/or participates in any University investigation is prohibited. Retaliation is also prohibited against any individual who files a discrimination complaint or participates in a complaint investigation in any manner. Any substantiated act of retaliation may result in sanctions or other disciplinary action as covered by University Policy (including the Code of Student Responsibility) and/or the disciplinary procedures pursuant to the applicable collective bargaining agreements, and applicable policies and procedures.

Affirmative action requires that the university take specific actions and make special efforts to recruit, employ, and promote qualified members of formerly excluded or clearly underrepresented groups. To further ensure the goals of equal opportunity and affirmative action with respect to employment and education, the University endeavors to increase the availability of opportunities for students, staff, and faculty from groups that have been previously excluded or underrepresented. Students or employees having disabilities that require reasonable accommodations or auxiliary aids may be accommodated through the Office of the ADA Coordinator.

For more information, contact Student Accessibility Support center (SASC) in 128 Educational Communication Center (ECC) or call 631-632-6748. Any questions concerning this policy or allegations of noncompliance should be directed to the Office for Institutional Diversity and Equity (OIDE), 201 Administration Building or call 631-632-6280.
P106: SEXUAL MISCONDUCT & REPORTING POLICY (March 2019)

Stony Brook University is committed to creating and maintaining workplace, educational, and recreational environments that are safe and accessible, and free of all forms of discrimination on the basis of sex, gender and/or gender identity or expression - which includes: discriminatory harassment and sexual harassment, non-consensual sexual contact, sexual violence/assault, domestic violence, dating violence, and stalking. Such behavior is prohibited and will not be tolerated, as it violates Title VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972 and New York State Law. This policy applies to all University students and employees, regardless of sexual orientation, gender and/or gender identity or expression, as well as individuals outside the University Community, including but not limited to guests, visitors, vendors, and volunteers.

ACCREDITATION STATEMENT

As a regional accrediting body, the Middle States Commission on Higher Education ("Middle States") examines each of its member institutions periodically to help promote educational excellence and ensure compliance with its outlined standards of quality. Stony Brook University received its initial accreditation from Middle States in 1957. Our Middle States membership demonstrates our commitment to self-assessment and to providing a comprehensive world-class education, which inspires lifelong learning.

Stony Brook University is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104. (267-284-5000) www.msche.org. The MSCHE is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Council for Higher Education Accreditation (CHEA). STONY BROOK UNIVERSITY ATHLETIC TRAINING PROGRAM

The Stony Brook University (SBU) Athletic Training Program (ATP), offered by the School of Health Technology and Management (SHTM), is a Commission on Accreditation of Athletic Training Education (CAATE) accredited program.

DESCRIPTION OF THE ATHLETIC TRAINING PROFESSIONAL

Athletic Trainers (ATs) are healthcare professionals who collaborate with physicians to optimize activity and participation of patients and clients. Athletic training (AT) encompasses the prevention, diagnosis and intervention of emergency, acute and chronic conditions involving impairment, functional limitations and disabilities. AT is recognized by the American Medical Association (AMA) as a healthcare profession.

PROGRAM DESCRIPTION

The ATP combines classroom, laboratory and clinical education experiences in a process that culminates with the student graduating with eligibility to take the Board of Certification (BOC) Examination. This comprehensive professional preparation is directed toward the development of specified competencies in the following content areas: Evidence-Based Practice, Prevention and Health Promotion, Clinical Examination and Diagnosis, Acute Care of Injury and Illness, Therapeutic Interventions, Psychological Strategies and Referral, Healthcare Administration, and Professional Development and Responsibility. The experience at SBU prepares students to pass the examination, obtain an entry-level position and/or pursue graduate level education in advanced athletic training or other disciplines. Although our patient population has traditionally been those individuals who meet the definition of athlete, athletic trainers render services in a managed-care model with a global understanding of the rapidly changing health care provider system and the evolving base of our potential clientele.

CORE VALUES

Compassion, Integrity, Perseverance, Accountability, Pride

MISSION STATEMENT

The mission of the CAATE-accredited Stony Brook University Athletic Training Program is to provide students with an extensive and comprehensive didactic and clinical education from which to build a strong foundation for a career in athletic training.
STUDENT LEARNING OUTCOMES AND OBJECTIVES

1. Understand and incorporate evidence-based practice into clinical decisions.
   1.1. Develop relevant clinical questions using accepted methods (i.e. PICO).
   1.2. Understand levels of evidence with regard to study types, clinical practice guidelines and critically appraised topics.
   1.3. Successfully locate and critically appraise a variety of healthcare related literature from appropriate electronic databases and online libraries.
   1.4. Understand methods of assessing patient status and progress with clinical outcomes assessments.
   1.5. Utilize current evidence-based concepts in all aspects of patient care.
   1.6. Incorporate patient-centered outcome measures to evaluate the quality of care provided.

2. Develop and implement strategies to prevent injury and optimize patients’ overall health and quality of life.
   2.1. Administer testing procedures to obtain baseline data regarding a client's/patient's level of general health (including nutritional habits, physical activity status, and body composition). Use this data to design, implement, evaluate, and modify a program specific to the performance and health goals of the patient.
   2.2. Develop, implement, and monitor prevention strategies for at-risk individuals (eg, persons with asthma or diabetes, persons with a previous history of heat illness, persons with sickle cell trait) and large groups to allow safe physical activity in a variety of conditions.
   2.3. Select, apply, evaluate, and modify appropriate standard protective equipment, taping, wrapping, bracing, padding, and other custom devices for the client/patient in order to prevent and/or minimize the risk of injury to the head, torso, spine, and extremities for safe participation in sport or other physical activity.

3. Demonstrate the clinical skills and knowledge to evaluate and diagnose emergency and ambulatory acute and chronic injuries and illnesses; including the ability to identify the need for referral to appropriate health care providers.
   3.1. Clinically evaluate and manage a patient with an emergency injury or condition to include the assessment of vital signs and level of consciousness, activation of emergency action plan, secondary assessment, diagnosis, and provision of the appropriate emergency care.
   3.2. Perform a comprehensive clinical examination of a patient with an upper extremity, lower extremity, head, neck, thorax, and/or spine injury or condition. This exam should incorporate clinical reasoning in the selection of assessment procedures and interpretation of findings in order to formulate a differential diagnosis and/or diagnosis, determine underlying impairments, and identify activity limitations and participation restrictions.
   3.3. Perform a comprehensive clinical examination of a patient with a common illness/condition that includes appropriate clinical reasoning in the selection of assessment procedures and interpretation of history and physical examination findings in order to formulate a differential diagnosis and/or diagnosis.
   3.4. Determine whether patient referral is needed, and identify potential restrictions in activities and participation. Formulate and communicate the appropriate return to activity protocol.
4. **Design and implement appropriate therapeutic interventions for injuries and illnesses, including, but not limited to: therapeutic exercise and modalities, manual therapy techniques, psychosocial intervention and referral, and education regarding use of pharmaceuticals.**
   4.1. Create and implement a therapeutic intervention that targets treatment goals to include, as appropriate, therapeutic modalities, medications (with physician involvement as necessary), and rehabilitative techniques and procedures.
   4.2. Select and integrate appropriate psychosocial techniques into a patient's treatment or rehabilitation program to enhance rehabilitation adherence, return to play, and overall outcomes.
   4.3. Select and integrate appropriate psychosocial techniques into a patient's treatment or rehabilitation program to enhance rehabilitation adherence, return to play, and overall outcomes.
   4.4. Demonstrate the ability to recognize and refer at-risk individuals and individuals with psychosocial disorders and/or mental health emergencies.

5. **Integrate best practice in health care administration policy and procedures.**
   5.1. Utilize documentation strategies to effectively communicate with patients, physicians, insurers, colleagues, administrators, and parents or family members while using appropriate terminology and complying with statues that regulate privacy of medical records.
   5.2. Develop an appropriate management plan (including recommendations for patient safety and activity status) that establishes a professional helping relationship with the patient, ensures interactive support and education, and encourages the athletic trainer's role of informed patient advocate in a manner consistent with current practice guidelines.

6. **Uphold the NATA Code of Ethics and practice within state and national regulations and guidelines for athletic trainers.**
   6.1. Abide by the Standards of Practice established by the Board of Certification.
   6.2. Abide by the NATA Code of Ethics
   6.3. Abide by all State laws governing the practice of athletic training.

7. **Challenge and pass the Board of Certification exam on the first attempt.**
   7.1. Complete and pass the BOC exam on the first attempt.

8. **Successfully transition into professional practice as an athletic trainer immediately upon graduation.**
   8.1. Obtain NPI number.
   8.2. Obtain state licensure (as applicable).
   8.3 Employed as an Athletic Trainer.
   8.4 Graduate with a MS in Athletic Training.

9. **Be advocates for the profession of athletic training through providing quality health care services to their patients, educating the public and other health care professionals about athletic training, and practice within state and national regulations and guidelines for athletic trainers.**
   9.1. Describe the role and function of the National Athletic Trainers' Association and its influence on the profession.
   9.2. Describe the role and function of the Board of Certification, the Commission on Accreditation of Athletic Training Education, and state regulatory boards.
   9.3. Explain the role and function of state athletic training practice acts and registration, licensure, and certification agencies including (1) basic legislative processes for the implementation of practice
acts, (2) rationale for state regulations that govern the practice of athletic training, and (3) consequences of violating federal and state regulatory acts.

9.4. Access, analyze, and differentiate between the essential documents of the national governing, credentialing and regulatory bodies, including, but not limited to, the NATA Athletic Training Educational Competencies, the BOC Standards of Professional Practice, the NATA Code of Ethics, and the BOC Role Delineation Study/Practice Analysis.

9.5. Explain the process of obtaining and maintaining necessary local, state, and national credentials for the practice of athletic training.

10. The program will provide an academic curriculum based on the most current knowledge, skills, and abilities of the athletic training profession.

10.1 Students will demonstrate academic proficiency in the knowledge, skills, and clinical abilities of the athletic training profession.

10.2 Faculty will provide instruction of on the most current knowledge, skills, and abilities of the athletic training profession in a manner that meets the universities minimal instructional responsibilities.

11. The program will provide a comprehensive clinical education experience that addresses the continuum of care for the athletic trainer.

11.1 Students will complete a progressive and diverse clinical education sequence.

11.2 Preceptors will provide students with authentic opportunities to integrate AT KSA’s.

11.3 Clinical Education sites will provide students with authentic opportunities to integrate AT KSA’s
CAATE STANDARDS FOR THE ACCREDITATION OF
PROFESSIONAL ATHLETIC TRAINING PROGRAMS GLOSSARY

Academic year: Customary annual period of sessions at an institution. The academic year is defined by the institution.

Action plan for correction of BOC examination pass-rate deficiency:
A. A review and analysis of the program’s previously submitted action plans. This should include
   1. any assessment data used to evaluate the previous action plan,
   2. a discussion of strategies that have and have not worked, and
   3. any revisions that have been made to the previous action plan based on subsequent assessment data.
B. Analysis of the program’s current BOC examination pass rate (for the most recent three years) and progress toward compliance, including
   1. the number of students enrolled in the program in each of the past three years,
   2. the number of students who have attempted the exam in each of the past three years,
   3. the cohort-by-cohort first-time pass rate for each of the past three exam cohorts, and
   4. the three-year aggregate first-time pass rate for each of the past three years.
C. Projection for the program’s anticipated exam outcomes for next year.
   This is an analysis of how well the program believes its new action plan (see below) will improve exam performance for the next exam cohort and how they expect this to affect their three-year aggregate first-time pass rate in the next year.
   The analysis must include
   1. an analysis of the number of students expected to take the exam in the next year, based on current enrollment;
   2. a conservative estimated annual first-time pass rate for the upcoming year, given the steps outlined in the action plan (see below) and current student potential;
   3. a conservative estimated three-year aggregate first-time pass rate for the upcoming year, based on the projection provided (see above); and
   4. a narrative discussing the likelihood that the program will come into compliance with Standard 6 in the next year, given the data provided in C.1, C.2, and C.3 above.
   The action plan, developed as part of the analytic progress report, must include all of the elements identified in Standard 5. These include
   1. developing targeted goals and action plans to achieve the desired outcomes,
   2. stating the time lines for reaching the outcomes, and
   3. identifying the person or persons responsible for each element of the action plan.
D. Updating the elements of the action plan as they are met or as circumstances change.

Adjunct faculty: Individuals contracted to provide course instruction on a full-course or partial-course basis but whose primary employment is elsewhere inside or outside the institution. Adjunct faculty may be paid or unpaid.

Affiliation agreement: A formal agreement between the program's institution and a facility where the program wants to send its students for course-related and required off-campus clinical education. This agreement defines the roles and responsibilities of the host site, the affiliate, and the student. See also Memorandum of understanding.
Assessment plan: A description of the process used to evaluate the extent to which the program is meeting its stated educational mission, goals, and outcomes. The assessment plan involves the collection of information from a variety of sources and must incorporate assessment of the quality of instruction (didactic and clinical), quality of clinical education, student learning, and overall program effectiveness. The formal assessment plan must also include the required student achievement measures identified in Standard 5. The assessment plan is part of the framework.

Associated faculty: Individuals with a split appointment between the program and another institutional entity (for example, athletics, another program, or another institutional department). These faculty members may be evaluated and assigned responsibilities by multiple supervisors.

Athletic trainer: Health care professionals who render service or treatment, under the direction of or in collaboration with a physician, in accordance with their education and training and the state's statutes, rules, and regulations. As a part of the healthcare team, services provided by athletic trainers include primary care, injury and illness prevention, wellness promotion and education, emergent care, examination and clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions. An athletic trainer is state credentialed (in states with regulation), certified, and in good standing with the Board of Certification.

Athletic training clinical experiences: Direct client/patient care guided by a preceptor who is an athletic trainer or physician. Athletic training clinical experiences are used to verify students’ abilities to meet the curricular content standards. When direct client/patient care opportunities are not available, simulation may be used for this verification. See also Clinical education.

Biometrics: Measurement and analysis of physical characteristics and activity.

Clinical education: A broad umbrella term that includes three types of learning opportunities to prepare students for independent clinical practice: athletic training clinical experiences, simulation, and supplemental clinical experiences.

Clinical site: A facility where a student is engaged in clinical education.

Contemporary expertise: Knowledge and training of current concepts and best practices in routine areas of athletic training, which can include prevention and wellness, urgent and emergent care, primary care, orthopedics, rehabilitation, behavioral health, pediatrics, and performance enhancement. Contemporary expertise is achieved through mechanisms such as advanced education, clinical practice experiences, clinical research, other forms of scholarship, and continuing education. It may include specialization in one or more of the identified areas of athletic training practice. An individual’s role within the athletic training program should be directly related to the person’s contemporary expertise.

Core faculty: Faculty with full faculty status, rights, responsibilities, privileges, and college voting rights as defined by the institution and who have primary responsibility to the program. These faculty members are appointed to teach athletic training courses, advise, and mentor students in the athletic training program. Core, full-time faculty report to, are evaluated by, and are assigned responsibilities by the administrator (chair or dean), in consultation with the program director, of the academic unit in which the program is housed. A core faculty member must be an athletic trainer or physician.

Durable medical equipment: Equipment that can withstand repeated use, is primarily and customarily used to serve a medical purpose, is generally not useful to a person in the absence of an illness or injury, and is appropriate for use in the home.
**Electronic health record**: A real-time, patient-centered, and HIPAA-compliant digital version of a patient’s paper chart that can be created and managed by authorized providers across more than one health care organization.

**Evidence-based practice**: The conscientious, explicit, and judicious use of current best evidence in making decisions about the care of an individual patient. The practice of evidence-based medicine involves the integration of individual clinical expertise with the best available external clinical evidence from systematic research. Evidence-based practice involves the integration of best research evidence with clinical expertise and patient values and circumstances to make decisions about the care of individual patients.

**Faculty**: See Adjunct faculty; Associated faculty; Core faculty.

**First-time pass rate on the Board of Certification examination**: The percentage of students who take the Board of Certification examination and pass it on the first attempt. Programs must post the following data for the past three years on their website: the number of students graduating from the program who took the examination; the number and percentage of students who passed the examination on the first attempt; and the overall number and percentage of students who passed the examination, regardless of the number of attempts.

**Foundational knowledge**: Content that serves as the basis for applied learning in an athletic training curriculum.

**Framework**: A description of essential program elements and how they’re connected, including core principles, strategic planning, curricular design (for example, teaching and learning methods), curricular planning and sequencing, and the assessment plan (including goals and outcome measures).

**Goals**: Specific statements of educational intention that describe what must be achieved for a program to meet its mission.

**Graduate placement rate**: Percentage of students within six months of graduation who have obtained positions in the following categories: employed as an athletic trainer, employed as other, and not employed. Programs must post the following data for the past three years on their website: the number of students who graduated from the program, the number and percentage of students employed as an athletic trainer, the number and percentage of students employed as other, and the number and percentage of students not employed.

**Health care providers**: Individuals who hold a current credential to practice the discipline in the state and whose discipline provides direct patient care in a field that has direct relevancy to the practice and discipline of athletic training. These individuals may or may not hold formal appointments to the instructional faculty.

**Health care informatics**: The interdisciplinary study of the design, development, adoption, and application of information technology-based innovations in the delivery, management, and planning of health care services.

**Health literacy**: The degree to which an individual has the capacity to obtain, process, and understand basic health information and services in order to make appropriate health decisions.

**Immersive clinical experience**: A practice-intensive experience that allows the student to experience the totality of care provided by athletic trainers.
**International Classification of Functioning, Disability, and Health (ICF):** A conceptual model that provides a framework for clinical practice and research. The ICF is the preferred model for the athletic training profession.

**Interprofessional education:** When students from two or more professions learn about, from, and with each other to enable effective collaboration and improve health outcomes.

**Interprofessional practice:** The ability to interact with, and learn with and from, other health professionals in a manner that optimizes the quality of care provided to individual patients.

**Medical director:** Currently licensed allopathic or osteopathic physician who is certified by an ABMS- or AOA-approved specialty board and who serves as a resource regarding the program’s medical content.

**Memorandum of understanding:** Document describing a bilateral agreement between parties. This document generally lacks the binding power of a contract.

**Mission:** A formal summary of the aims and values of an institution or organization, college/division, department, or program.

**Outcomes:** Indicators of achievement that may be quantitative or qualitative.

**Patient-centered care:** Care that is respectful of, and responsive to, the preferences, needs, and values of an individual patient, ensuring that patient values guide all clinical decisions. Patient-centered care is characterized by efforts to clearly inform, educate, and communicate with patients in a compassionate manner. Shared decision making and management are emphasized, as well as continuous advocacy of injury and disease prevention measures and the promotion of a healthy lifestyle.

**Physician:** Health care provider licensed to practice allopathic or osteopathic medicine.

**Physiological monitoring systems:** Ongoing measurement of a physiological characteristic. Examples include heart rate monitors, pedometers, and accelerometers.

**Preceptor:** Preceptors supervise and engage students in clinical education. All preceptors must be licensed health care professionals and be credentialed by the state in which they practice. Preceptors who are athletic trainers are state credentialed (in states with regulation), certified, and in good standing with the Board of Certification. A preceptor’s licensure must be appropriate to his or her profession. Preceptors must not be currently enrolled in the professional athletic training program at the institution. Preceptors for athletic training clinical experiences identified in Standards 14 through 18 must be athletic trainers or physicians.

**Professionalism:** Relates to personal qualities of honesty, reliability, accountability, patience, modesty, and self-control. It is exhibited through delivery of patient-centered care, participation as a member of an interdisciplinary team, commitment to continuous quality improvement, ethical behavior, a respectful demeanor toward all persons, compassion, a willingness to serve others, and sensitivity to the concerns of diverse patient populations.

**Professional preparation:** The preparation of a student who is in the process of becoming an athletic trainer (AT). Professional education culminates with eligibility for Board of Certification (BOC) certification and appropriate state credentialing.
**Professional program**: The graduate-level coursework that instructs students on the knowledge, skills, and clinical experiences necessary to become an athletic trainer, spanning a minimum of two academic years.

**Professional socialization**: Process by which an individual acquires the attitudes, values and ethics, norms, skills, and knowledge of a subculture of a health care profession.

**Program graduation rate**: Measures the progress of students who began their studies as full-time degree-seeking students by showing the percentage of these students who complete their degree within 150% of “normal time” for completing the program in which they are enrolled. Programs must post the following data for the past three years on their website: the number of students admitted to the program, the number of students who graduated, and the percentage of students who graduated.

**Program personnel**: All faculty (core, affiliated, and adjunct) and support staff involved with the professional program.

**Program retention rate**: Measures the percentage of students who have enrolled in the professional program who return to the institution to continue their studies in the program the following academic year. Programs must post the following data for the past three years on their website: the number of students who enrolled in the program, the number of students returning for each subsequent academic year, and the percentage of students returning for each subsequent academic year.

**Quality assurance**: Systematic process of assessment to ensure that a service is meeting a desired level.

**Quality improvement**: Systematic and continuous actions that result in measurable improvement in health care services and in the health status of targeted patient groups. Quality improvement includes identifying errors and hazards in care; understanding and implementing basic safety design principles such as standardization and simplification; continually understanding and measuring quality of care in terms of structure, process, and outcomes in relation to patient and community needs; and designing and testing interventions to change processes and systems of care, with the objective of improving quality.

**Scholarship**: Scholarly contributions that are broadly defined in four categories.
- Scholarship of discovery contributes to the development or creation of new knowledge.
- Scholarship of integration contributes to the critical analysis and review of knowledge within disciplines or the creative synthesis of insights contained in different disciplines or fields of study.
- Scholarship of application/practice applies findings generated through the scholarship of integration or discovery to solve real problems in the professions, industry, government, and the community.
- Scholarship of teaching contributes to the development of critically reflective knowledge associated with teaching and learning.

**Simulation**: An educational technique, not a technology, to replace or amplify real experiences with guided experiences that evoke or replicate substantial aspects of the real world in a fully interactive manner. See also Clinical education.

**Social determinants of health**: The conditions in which people are born, grow, live, work, and age. These circumstances are shaped by the distribution of money, power, and resources at global, national, and local levels.
**Socioeconomic status**: The social standing or class of an individual or group, frequently measured in terms of education, income, and occupation. Socioeconomic status has been linked to inequities in access to resources, and it affects psychological and physical health, education, and family well-being.

**Supervision**: Supervision occurs along a developmental continuum that allows a student to move from interdependence to independence based on the student’s knowledge and skills as well as the context of care. Preceptors must be on-site and have the ability to intervene on behalf of the athletic training student and the patient. Supervision also must occur in compliance with the state practice act of the state in which the student is engaging in client/patient care.

**Supplemental clinical experiences**: Learning opportunities supervised by health care providers other than athletic trainers or physicians. See also Clinical education.

**Technical standards**: The physical and mental skills and abilities of a student needed to fulfill the academic and clinical requirements of the program. The standards promote compliance with the Americans with Disabilities Act (ADA) and must be reviewed by institutional legal counsel.

**Value-based care models**: Health care delivery system focused on the value of care delivered rather than on a fee-for services approach.
PROGRAM PERSONNEL ROLES AND RESPONSIBILITIES

The development of a successful program requires that the Athletic Training Program faculty, the Preceptors and Athletic Training Students work together to continually improve the overall quality of education.

THE ATHLETIC TRAINING STUDENT (ATS)

Each ATS enrolled in the post baccalaureate ATP is expected to follow all guidelines established by SBU and the ATP. ATS are responsible for maintaining high performance standards in both the classroom and clinical settings. This policy and procedure manual details the expectations placed upon the ATS in these settings. Failure to abide by the policies and procedures set forth can result in the ATS being dismissed from the ATP. There are high expectations placed on the ATS. ATS are expected to be reliable, dependable, trustworthy, diligent, and dedicated in their efforts. ATS must conduct themselves with the highest degree of decorum and to represent themselves, the faculty/staff, program, and the university with professionalism beyond reproach.

THE ATHLETIC TRAINING FACULTY

The ATP faculty is responsible for the didactic education, academic advising, and career counseling for the ATS enrolled in this program. It is the responsibility of the ATP faculty to provide the ATS with a high level of classroom instruction that prepares them to function clinically and culminates in an ATS possessing the skills and knowledge necessary to become a certified athletic trainer.

THE PRECEPTOR

The preceptor is responsible for a large portion of the ATS total education. These are the individuals who will mentor the ATS during their clinical experiences.

Requirements

- Credentialed by the state in a healthcare profession
- Receive planned and ongoing education from the program designed to promote a constructive learning environment
  - Initial preceptor training by Clinical Coordinator/designated faculty member to discuss clinical policies & procedures
  - Participate in annual Program Review
- Demonstrate understanding of and compliance with the program’s policies and procedures

At the beginning of each clinical experience ATS should expect the following from the assigned preceptor:

- proper orientation to the policies and procedures/OSHA regulations/EAP of the affiliated site
- proper instruction and/or evaluation of the Athletic Training Educational Competencies in cooperation and conjunction with the ATS
• provide accurate documentation of the ATS supervised athletic training clinical experience, and maintain files on site
• review of the evaluation materials submitted by the ATS

The preceptor will assist the ATS in refining their skills and knowledge. Walls do not limit classrooms. The practice field, game court, and athletic training room are also to be viewed as learning environments. The clinical experience environment is designed to further enhance the learning of theories and skills taught in the classroom. The preceptor is expected to:

• provide the SBU ATP with a current resume, proof of national and NYS certifications
• maintain a commitment to ATP through regular communication with the Clinical Coordinator
• be a role model to ATS
• mentor ATS
• adhere to SBU and ATP policies and procedures
• adhere to CAATE Standards
• stay current and up-to-date with trends in the medical field
• maintain open communication with the program personnel

**** Only preceptors provide assessment of athletic training students’ clinical proficiencies and submit the ATS Evaluation Forms via E*Value****

****For ATS and preceptor, report any misconduct or gross clinical deficiencies immediately to the Clinical Coordinator****

In order to provide for a well-rounded clinical experience and promote consistency throughout all of the affiliated clinical sites, the following are recommendations for the preceptor to enhance the clinical educational experience:

• Daily or weekly rounds on athletes’ status and progress
• Weekly theme and topic review of previous, current, and future material
• Review of selected prior case studies
• Present a case to the team physician
• Demonstrate the use of therapeutic equipment
• Develop problem solving skills through scenarios

All of the above recommendations can be utilized to complement the particular ATS assigned competency tasks regardless of their program level.

Refer to Appendix D for tips on successful clinical experience.
ACADEMIC REQUIREMENTS

The Athletic Training Program (ATP) is seeking qualified students who will meet the challenges of an extensive and comprehensive didactic and clinical education from which to build a strong foundation for a career in the field of athletic training. These students will have the opportunity to develop applied technical and clinical skills incorporating analytical problem-solving abilities to assist with the daily operation of athletic training practice settings.

This program is offered through the School of Health Technology and Management (SHTM). Students are required to abide by all of the rules and regulations set forth by the program, department, college and university. To ensure that you are aware of your rights and responsibilities as well as the expectations placed on you, make sure that you are in possession of the following documents:

- Athletic Training Program Policy and Procedure Manual (this document)
- School of Health Technology and Management Student Orientation Handbook (SHTM new student web site and AT Majors Blackboard community page)
- Health Sciences Bulletin [https://www.stonybrook.edu/hsbulletin/](https://www.stonybrook.edu/hsbulletin/)
- University Community Standards [https://www.stonybrook.edu/commcms/studentaffairs/ucs/](https://www.stonybrook.edu/commcms/studentaffairs/ucs/)
ADMISSIONS PROCEDURE FOR THE

ATHLETIC TRAINING PROGRAM

The Stony Brook University Athletic Training Program seeks qualified students who will meet the challenge of a Master of Science program. Much time and energy is put into the student selection process. Program admissions policies and procedures are designed to make possible careful choices which take many factors into consideration. Since our program exists to prepare students to become certified and competent athletic trainers, we attempt to identify applicants who have made, or who seem likely to make, a career commitment to athletic training.

All applications meeting the program’s minimum requirements will be reviewed for academic preparation, clinical observation and references to determine selection for an interview (in-person, telephone or skype).

Response to all inquiries received either by email, phone or in person is made, referring prospective candidates to the program website. The website contains descriptive information on our program including our email address. It states that information sessions are held for prospective applicants. In addition, the website gives the applicant information regarding tuition, fees and other programmatic costs as well as program outcomes.

After reading the website, a person who determines that she/he meets the prerequisites contacts ATCAS (the Athletic Training Centralized Application Service) to apply online to the program. Since we only received access in late January, we have limited time to fill a cohort. We have a rolling admissions process. Applications will be reviewed and interviews offered on a first-come first-serve basis as the application is verified on ATCAS or until the application closes on the deadline of May 8, 2020, for a May 26, 2020 start date.

All applications are carefully reviewed by the program’s admissions committee. Selected applicants are invited for personal interviews (in-person, telephone or skype). Meeting the minimum requirements does not guarantee admission, nor does it guarantee an interview. Each candidate is evaluated based on a variety of factors including, but not limited to, academic achievement, references, demonstrated concern for others, motivation and quality of past health care experience.

Athletic Training Program Admissions Committee

The program’s admissions committee will consist of all program faculty members, a minimum of two students from each of our first year and second year classes. Each person is appointed to the committee by the SHTM Dean and must participate in a training workshop prior to participating in the interviews. In addition, each committee member is briefed on the athletic training program interview process and given an opportunity to review the application materials prior to each interview. The objectives of this orientation are to:

1. acquaint the members with the admissions process
2. familiarize with the criteria for admission
3. inform members of interview procedure
Application Assessment Criteria

A Review of Application sheet is completed for all applicants in order to determine whether or not they qualify for an interview. All applicant files are reviewed by either a program faculty or professional staff member. Each file is reviewed a minimum of two times in order to ensure accuracy in the review process. Candidates are considered for personal interviews based on the following criteria:

❖ completion of a baccalaureate degree
❖ a minimum overall cumulative grade point average of 3.00 on a scale of 4.0
❖ completion of, or statement of intended completion of (minimum grade of “C”):
  ● 4 credits of Biology with lab
  ● 8 credits of Anatomy and Physiology I and II with labs
  ● 4 credits of Chemistry with lab
  ● 4 credits of Physics with lab
  ● 3 credits of Statistics
  NOTE: Required science coursework must be completed within the last ten years.
❖ Current certification in basic life support (BLS) cardiopulmonary resuscitation (CPR)
❖ 50 hours of volunteer clinical experience observing an athletic trainer
❖ the following coursework is recommended:
  ● Kinesiology or Biomechanics
  ● Exercise Physiology
  ● Nutrition

If any prerequisites are missing, reference must be made on the application that the applicant is aware of the deficiency and intends to meet the requirement prior to entry into the program.

Student selection is based on several factors: academic preparation, healthcare experience, and demonstrated concern for human beings. That an applicant has these qualities is determined through transcript review, reading the personal statement, personal interview (in-person, telephone or skype) and three academic or professional reference letters preferably chosen from the following sources:

1. a physician or other health professional for whom the applicant has worked
2. present or past employer/supervisor
3. instructor in college science course or college faculty advisor

In order to be invited for an interview (in-person, telephone or skype), a candidate must meet or exceed program requirements as described in the preferences above, have performed well in the sciences, have a literate and thoughtful personal statement, and good references. Interviews (in-person, telephone or skype) are offered on a first-come first-served basis.

The candidate will be required to sign a condition form acknowledging that they will provide the program with all official transcripts from any institution previously attended and current BLS certification prior to starting the program. The signature on this condition form indicates understanding on the part of the candidate that entry into the program is conditional upon fulfillment of all requirements. Copies of the condition form are kept by the student and the program candidate’s file. If the conditions are not successfully completed within the timeline outlined by the program admission committee by the applicant, the program reserves the right to rescind the seat.
Application Decision Prior to the Interview (in-person, telephone or skype)

Each application is reviewed by a member of the athletic training program admissions committee.

Candidates meeting the minimum admission requirements will be placed in an INTERVIEW category. The applicant will be invited via e-mail or phone call from the department to schedule an interview.

If an applicant is placed in the NON-ACCEPT category because of failure to meet one or more of the above criteria, at least 2 committee members must review the application and agree on the decision.

An application may be placed on HOLD pending clarification of information. If there is a question requiring further information or clarification, the department will communicate with the candidate.

The Interview (in-person, telephone or skype)

During the interview the candidate is asked, among other things, to describe her/his desire to pursue the athletic training profession and their perception of the athletic trainer's role on the healthcare team and patient care. From these types of questions, the interviewers try to identify individuals who project an especially high understanding of the profession and relate that to the healthcare team.

Each candidate is given an interview (in-person, telephone or skype) with members of the admissions committee. It is the policy of the program that every attempt will be made to ensure that all candidates are interviewed by at least one student and one faculty member. Telephone and skype interviews are given on a case-by-case basis.

Each interview will be approximately 25 minutes. An additional 10 minutes will allow the committee members to finish writing comments and complete the School of Health Technology and Management (SHTM) Prospective Student Interview Form. The interview committee will have a set of predetermined questions. Committee will review and applicant will receive an “Admissions Checklist” containing important information to familiarize applicant with deadlines, costs, requirements, etc.

The Decision

At the completion of the interview, each interviewer determines an interview score based on the SHTM’s Prospective Student Interview Form. A composite score based on the interview scores and academic preparation will determine the ranking order of the candidates.

The ATP Admissions committee will meet within 7 days after the final interview to discuss the candidates and select the top students and additional alternate ranked students.

All AT admissions committee decisions are presented to the SHTM Admissions Committee. Upon approval of the SHTM Admissions Committee, the program may call the Accepts but all correspondence is sent from the SHTM Admissions Committee (i.e. Dean’s office).

Students accepted into the Athletic Training Program will be notified by phone call from the Program Chair in addition to a letter from the SHTM Dean’s Office.
Admission Deferrals
Occasionally an applicant will gain admission to the athletic training program and subsequently must withdraw from the class prior to the start of their program due to unforeseen circumstances that preclude their attendance. Examples of such circumstances include the sudden illness of a family member that necessitates the applicant’s presence, a change in financial status that makes college unaffordable, or a student in a military reserve unit who is called to active duty.

The decision to grant deferral status is made on a case-by-case basis. The program chair consults with faculty and recommends deferral for one year and for one year only. Such deferral guarantees admission to the following year’s class.
GENERAL CONSIDERATIONS AND REQUIREMENTS

Candidates are considered for personal interviews based on the following criteria:

- completion of a baccalaureate degree
- a minimum overall cumulative grade point average of 3.00 on a scale of 4.0

Minimum required courses are listed below & must be completed with a minimum grade of C:

<table>
<thead>
<tr>
<th>Credits</th>
<th>Course</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>Biology with lab*</td>
</tr>
<tr>
<td>8</td>
<td>Anatomy &amp; Physiology I &amp; II with labs*</td>

<tr>
<td>4</td>
<td>Chemistry with lab*</td>
</tr>
<tr>
<td>4</td>
<td>Physics with lab*</td>
</tr>
<tr>
<td>3</td>
<td>Statistics</td>
</tr>
</tbody>
</table>

*Required science coursework must be completed within the last ten years

- Current certification in basic life support (BLS) cardiopulmonary Resuscitation (CPR)
- 50 hours of volunteer clinical experience observing an athletic trainer (AT)

The following coursework is recommended:

- Kinesiology or Biomechanics
- Exercise Physiology
- Nutrition

BEING A STUDENT-ATHLETE AND AN ATHLETIC TRAINING STUDENT

Students in this situation must realize that a dual commitment must be made and yearly progress towards completing the clinical requirements for graduation and certification must be demonstrated. ATS will not be eligible to receive credit for athletic training experience covering teams on which they are currently participating.

Should you have a conflict between an SA competition and a scheduled lecture or lab, you are expected to notify the instructor of that conflict at least 2 weeks in advance (exceptions may be made for
competitions rescheduled due to weather). At the time, you are expected to make arrangements with the instructor to resolve the conflict and complete any work to be missed (obtaining class notes or handouts, attending another lab/lecture, handing in assignments, etc.)

The ATP has required clinical experiences which are normally scheduled at the same time as athletic participation. All clinical experiences must be completed within the two year graduate program time frame.

**SCHOLARSHIPS**

Available scholarship opportunities will be disseminated through program announcements and the Scholarship Folder on the Athletic Training Program community site on Blackboard. Students are encouraged to search for scholarship opportunities through professional organizations (ie: NATA, EATA and NYSATA). In addition, the Henry and Marsha Laufer Scholarship is awarded to full-time matriculated students in degree-granting programs in the School of Health Technology and Management. Scholarship winners will be selected on the basis of academic credentials and performance, and are expected to demonstrate leadership potential as clinicians, educators, and/or researchers. Each year the Athletic Training Program offers two scholarships, at $2500 each, to first year students in the athletic training program.

Students are also able to use the following link for Graduate Scholarship opportunities available through the University [https://www.stonybrook.edu/commcms/finaid/graduate/types_of_aid/Scholarships.php](https://www.stonybrook.edu/commcms/finaid/graduate/types_of_aid/Scholarships.php)
The two year graduate curriculum consists of 77 graduate credits, including lecture, laboratory, and clinical education. Curriculum will include foundational content, patient care, research, and critical inquiry.

Year one will include coursework based on physical agents, professional practice, clinical diagnosis and treatment, critical care, evidence-based practice, research design, and two clinical education experiences.

Year two will introduce coursework in research methods, healthcare management, advance therapeutic intervention, nutrition, general medical conditions, research, and four clinical education rotations. Students will be conducting research, utilizing IRB protocol, culminating in a capstone activity resulting in a journal article-style report and poster. In addition, students will be participating in interprofessional education and interacting with other healthcare practitioners through the general medical conditions course and clinical education.

Each clinical rotation will involve a minimum number of hours dependent on course credit and location within the program course sequence.

ATHLETIC TRAINING STUDENT POLICIES

ADVISING

Upon acceptance into the ATP each student will be assigned an ATP faculty academic advisor. Students are required to meet at least two weeks prior to registration for each academic session.

COURSE PROGRESSION

Professional ATP courses (HAL) must be taken in a sequential manner. ATS who receive the grade of “D+” or below must first retake the course before progressing to the next course in the sequence. ATP professional courses may only be repeated once. An ATS who receives the grade of “C-” may progress on to the next sequence, but must remediate the insufficient grade. Failure to obtain the grade of “C” or higher in two attempts may result in the ATS being dismissed from the program.

UNIVERSITY POLICY STATEMENT REGARDING RELIGIOUS HOLIDAYS

● The University is committed to ensuring that every student will have the right to pursue their education while practicing their faith. To accomplish this, the Office of the Provost has undertaken the following strategic steps:
○ Stony Brook University is committed to providing the opportunity for all students to practice their faith.
○ Each spring the Office of the Provost will issue a listing of major religious holidays that will take place during the following academic year. This will ensure that faculty is aware of the major celebrations of the faiths practiced by our students.
○ All student absences in order to practice their faith will be viewed as an ‘excused absence’, with no negative consequence.
○ There will be no examinations, papers, presentations or other assignments due during any of the major holidays on which classes were previously cancelled. Faculty are asked to avoid scheduling examinations, papers, presentations or other assignments to be due on any of the major listed holidays. When this is unavoidable, students will be given the opportunity for an equivalent make-up.
○ Ten of our largest classrooms/lecture halls are equipped with Stony Brook Capture. All classes taking place in these rooms will be recorded and students will be able to access high quality MP3 playbacks of the full lecture.
○ All courses are registered on Blackboard, an online course management system. We will request that faculty post their lecture notes for classes taking place on any of the major holidays on their individual course site so that all students can access the material.
● Students will be expected to notify their professor in advance, but definitely before the final date of the ‘add/drop’ period of their intention to be out for religious observance. They can discuss with their faculty member at that time how they will be able to secure the work covered.
● If a student is not satisfied that they are being treated appropriately, they can reach out to the Office of the Provost to have their grievance addressed.
● Faculty who intend to observe a religious holiday should arrange at the beginning of the semester to reschedule missed classes or to make other provisions for their course-related activities.
● The text of the New York State Education Code will be posted on the academic calendar page on the website of the Office of the Registrar.

HEALTH CARE POLICY

A complete medical history and physical are required for all in-coming full time students at Stony Brook University. New York State Public Health Law requires that every student demonstrate proof of immunity against measles, mumps, and rubella. This law requires the University to prohibit students' future attendance if they fail to acquire or submit certification of the necessary immunizations. Compliance is mandatory; students who fail to provide proof of immunization will be prevented from registering for courses.

The Student Health Service provides health and counseling services to all Stony Brook University students. The walk-in clinic at the health service is staffed by physicians, physician assistants, nurse practitioners, and nurses. Students need only "walk in" to the Infirmary Building, register, and they will be seen by the medical staff. Appointments can be made on a same day basis. Some prescriptions can be filled and laboratory work completed as part of the mandatory fee. There is a gynecology clinic (Women's Center), wart clinic, health educator, psychiatrist, social worker, massage therapist, dermatology clinic, and registered dietician. The comprehensive fee, mandatory for all students, in part entitles students to health services. The University strongly recommends a voluntary health insurance plan because extensive medical assistance not available at the Health Service may cause financial difficulty.

In their role as faculty advisor, faculty may refer students and assist them in gaining access to these services. The ATP reserves the right to require students to seek professional medical/counseling services when there is evidence the student is not able to fulfill his or her responsibilities in the academic or clinical settings.

ATP students with health issues that may put them, their fellow students, faculty, staff, or the population they work with at risk for illness or disease, must identify these conditions to the Program Director (PD). Confidentiality will be practiced regarding the disclosure of any such conditions. Coordination between the PD, ATP Medical Director, ATS and the student’s personal physician will determine the appropriate course of action.
TECHNICAL STANDARDS

ATS must meet technical standards for continuation in the program. The form must be acknowledged and signed upon entry into the program, indicating an understanding of the standards that must be met. The form can be found in Appendix I and on the ATP web site.

COMMUNICABLE DISEASE POLICY

ATP students with health issues that may put them, their fellow students, faculty, staff, or the population they work with at risk for illness or disease, must identify these conditions to the Program Director (PD). Confidentiality will be practiced regarding the disclosure of any such conditions. Coordination between the PD, ATP Medical Director, ATS and the student’s personal physician will determine the appropriate course of action.

BLOODBORNE PATHOGEN POLICY

All athletic training students have the potential to be exposed to human blood and other potentially infectious materials during the clinical experience. The ATP provides yearly, formal bloodborne pathogen training prior to participation in the clinical education portion of the curriculum. Athletic training students have access to and can utilize multiple forms of personal protective clothing and equipment and engineering controls to reduce the risk of spreading potentially infectious diseases. Please refer to the program Bloodborne Pathogen Policy and Procedure (BBP P&P) on the following page for more information. Each clinical site also has BBP P&P available to the ATS as well as posted on the Blackboard community site.

GRIEVANCES

Personal conflicts can arise during the academic experience. The initial attempt at conflict resolution should include only those parties directly involved. If an amicable solution can not be reached, an impartial moderator should become involved. Any program affiliate (student, preceptor, faculty, and staff) may file a Grievance Report (Appendix H) with an impartial moderator who may hear both sides and then meet with the involved parties to discuss an appropriate resolution.

THERAPEUTIC EQUIPMENT POLICY

The ATP is committed to protecting the health and safety of the ATS, prospective ATS, patients, preceptors, and ATP faculty. Therefore, all electrical equipment used to meet education outcomes of the ATP will be inspected and calibrated annually by a professional technician. All therapeutic equipment will be inspected by the ATP faculty or preceptors before use in the classroom or clinical setting. Clinical sites will be required to provide documentation of annual calibration and inspection to the Clinical Coordinator.
If a piece of equipment appears to be defective, use of it will be stopped immediately and reported to Chair or the preceptor. The equipment will be removed from the classroom or clinical setting, if possible or unplugged and a visible “out of order” sign will be placed on the piece of equipment. Any repairs required to the equipment will be made according to manufacturer’s recommendation.

If the health and safety of a student assigned to a clinical site is questioned, the student will be removed from the clinical site until the concern is resolved or the student will be assigned to a different clinical site.
STONY BROOK UNIVERSITY
ATHLETIC TRAINING PROGRAM
BLOODBORNE PATHOGEN POLICY AND PROCEDURE

Exposure Procedure:

- All exposure incidents must be reported to the supervisor/preceptor and Clinical Coordinator immediately.
- The individual will receive appropriate on-site first aid care.
- The individual will be referred to their primary medical care provider, Student Health Service, Emergency Department, Employee Health or University Hospital for further medical care.
- An incident report will be completed within 48 hours of occurrence and a copy filed with the Program Director and the Department of Environmental Health and Safety.
- Student must follow up within 72 hours of exposure with Student Health Services or Preventive Medicine (631-444-2198) for testing, and or counseling.

General Wound Care:

- Wear gloves
- If possible, reduce your risk of exposure by having the student-athlete apply gauze and dressing (ie: Band Aid)
- Cleanse wound with antiseptic
- Apply antibiotic ointment, dressing and bandage; tape to secure
- Properly remove gloves and dispose of blood soaked material in red biohazard waste receptacle
- Wash hands with soap and water or anti-microbial solution immediately after any wound care

Equipment and Floor Contamination:

- Wear gloves
- Use appropriate disinfectant (ie: 1 to 10 dilution of bleach) and paper/cloth towel
- Contaminated cloth towels must be placed in a red biohazard bag to be laundered separately; If beyond laundering, dispose of in a red biohazard waste receptacle
- Paper towels must be disposed of in a red biohazard bag
- Remove gloves and discard of appropriately
- Wash hands with soap and water or anti-microbial solution immediately after any clean up

Clothing:

Small amounts – use 1:10 bleach solution or fabric cleaner directly on clothing until blood is no longer visible

Large amounts – place contaminated clothing in biohazard bag for laundering; ATS must change clothes
Severe Bleeding and/or Vomit:
Arterial bleeding, spurting blood or severe vomiting requires use of protective gown and facemask.

Additional Precautions:

- All blood saturated materials must be disposed of in red biohazard waste receptacle
- Any sharp or pointed objects must be disposed of in a designated “sharps” container to minimize risk of puncture contamination
CLASSROOM POLICIES

ATTENDANCE
Attendance at all lecture and laboratory sessions is mandatory. Unexcused absence and/or lateness may negatively affect the student’s final grade. Students should attend all lab sessions in appropriate attire for lab activity. Since critical thinking skills are necessary for the professional practitioner, and active participation is necessary in the learning process, the student is expected to participate in daily critical and creative discussions and explorations. At this level of education, it is the responsibility of the ATS to display a professional approach toward the learning process. Promptness, preparation, participation, and clean-up are expected. Absences from athletic training courses for team travel or special events will be allowed on a case by case basis. It is the responsibility of the student to notify the class instructor at least two weeks prior to the scheduled event. Approval will be granted by the instructor provided that the student is performing adequately.

EATING
Eating during class is allowed at the discretion of the instructor. Eating during laboratory sessions is prohibited. Beverage and food containers must be disposed of properly and surfaces must be cleaned prior to leaving the classroom.

EQUIPMENT
Laboratory equipment is available for education and research purposes. Equipment may be borrowed with instructor permission. Equipment is costly to purchase and maintain, thus it should be handled appropriately. Malfunctioning equipment should be reported to the instructor/preceptor. At the conclusion of class, equipment must be returned to its proper location so that it will be readily available for the next class. Shoes must be removed when using mats and treatment tables.

ELECTRONIC DEVICES
Electronic communication devices, including cellular phones, speakers, and headphones must be put away, not left on the desk/table, during any class.

COMPUTERS
Computer use must be limited to viewing course related content. Any student using electronic devices to view non-related content will lose computer use privileges.
STUDENT ACCESSIBILITY SUPPORT CENTER (SASC)

If students have a physical, psychological, medical or learning disability that may impact course work, please contact Student Accessibility Support Center, ECC (Educational Communications Center) Building, Room 128, (631) 632-6748. They will determine with you what accommodations, if any, are necessary and appropriate. All information and documentation is confidential.

Students who require assistance during emergency evacuation are encouraged to discuss their needs with their professors and Student Accessibility Support Center. For procedures and information go to the following website: http://www.stonybrook.edu/ehs/fire/disabilities.
CLINICAL POLICIES

DIRECT SUPERVISION

All ATS must be directly supervised by a preceptor during their clinical experiences. Direct supervision requires that the preceptor be physically present and have the ability to intervene on behalf of the athletic training student to provide on-going and consistent education. Also, the preceptor must consistently and physically interact with the ATS at the site of the clinical experience. If you find yourself in a position unsupervised you are not to provide patient care and will immediately call the Clinical Coordinator: 631-632-7255.

HEALTH ASSESSMENT

All students will have a yearly health assessment on file in the athletic training office prior to beginning a clinical experience. All required titers must have full laboratory reports attached to the student health form.

PROFESSIONALISM

All students are expected to behave professionally in the classroom, laboratory, and clinical settings. Those who fail to comply with this policy will be removed from the respective setting.

The student is responsible for notifying the Clinical Coordinator of any situation which may be deemed as a conflict of interest with their clinical assignment. Examples include, but are not limited to: relationships with patients, staff, supervisors, and faculty; current or former membership of a team assigned to a preceptor; prior personal relationship with anyone affiliated with the clinical site.

Professionalism is regarded with the utmost importance during the educational experience. Each ATS, regardless of the venue, is viewed as an extension and representative of SBU. Every ATS must maintain the highest professional standards and commitment, as displayed through appearance, conduct, and attitude. Poor exercise in judgment or conduct unbecoming an SBU ATS should be reported to the ATP staff via an Incident Report (Appendix E). The ATS may be counseled or disciplined. The ATS must remember that the preceptor, in conjunction with the ATP staff, retain the authority to determine the appropriateness of the ATS appearance and conduct.

CONFIDENTIALITY

ATS must complete HIPAA training prior to the start of clinical experience. ATS will always stay within the limits of their position and knowledge. Do not discuss any clinical information (injuries, treatments, doctor reports, etc.) with others. The confidentiality of the medical environment is paramount. **An ATS must not release information to anyone regarding a patient. This includes the health status of a patient, opening the patient’s file for inspection, copying or reproducing any reports, passing authorized**
information by telephone or using diagnostic test results for demonstration or instruction without prior, written permission. These guidelines must be adhered to strictly. Disregarding these instructions may result in prompt dismissal from the ATP.

SOCIAL MEDIA

There will be absolutely no Facebook “friending”, Twitter following, or other social media contact with minors with which the ATS comes into contact during the clinical experience. This includes during and after the completion of a given clinical assignment. The age of electronic communication can be very dangerous. Any contact with a minor outside of the supervised clinical environment can be misconstrued and raise concern over the behavior of the ATS, and thus, the ATP.

ATTENDANCE

Attendance at all scheduled clinical experience times is mandatory. The professional athletic training experience that occurs during clinical education is vital to the development of the skills necessary for becoming a certified athletic trainer. This aspect of your education should be considered just as important as the classroom experience. The critical thinking and practical application of skills in the clinical environment is a continuation of theory, knowledge, and skills introduced and acquired in the classroom and laboratory. Each ATS is expected to attend the clinical experience for no more than six consecutive days per week which might include weekend days. Students will have a minimum of one day off in every seven day period. The ATS is expected to attend all practices and/or games as agreed upon by the preceptor. All outside employment must be scheduled around the clinical experience. If a situation arises and the ATS must miss a practice or game, it is the responsibility of the ATS to notify the preceptor immediately. Absences from the clinical experience will be allowed on a case by case basis. It is the responsibility of the student to notify the preceptor at least two weeks in advance of a known absence. Failure of notification, or excessive absences, will result in a meeting between the ATS and the Clinical Coordinator, with an Incident Report (Appendix E) documenting the situation. Further actions, including academic warning, may result after the conference.

CLINICAL EXPERIENCE HOURS

The purpose of the clinical experience is to provide the ATS with “real world” athletic training experience. At the completion of the clinical experience, the student should have a pragmatic understanding of the typical daily schedule and activities of an Athletic Trainer. For this experience, the student is required to work directly with their preceptor assisting with clinical coverage. Typical daily coverage will include treatment and rehabilitation appointments, preparation of athletic teams for practice, providing medical coverage during athletic practices and games, and providing post-game/event coverage. The coverage will include weekends as assigned by the preceptor. You will get at least one day off in every seven day period. ATS are required to complete 40 hours per assigned course credit under the direct supervision of preceptors. Students should refer to the clinical course syllabus for the minimum and maximum hour requirements. These hours do not include travel and/or meal times.
INCLEMENT WEATHER ATTENDANCE POLICY

In the event of classes being cancelled due to inclement weather, the clinical experience may or may not be cancelled. While the University President has the authority to cancel classes, it is only the Governor who has the authority to close offices. On-campus students assigned to on-campus clinical experiences should check with their preceptor as to the status of the office being open or closed. Students who commute and deem the weather conditions hazardous should contact their preceptor to notify them that they will be unable to attend the clinical experience.

CLINICAL ASSIGNMENTS

The Clinical Coordinator will assign ATS to all clinical assignments according to the Standards set forth from CAATE. The clinical experience consists of 6 clinical courses in which the ATS is assigned to a preceptor for the clinical experience. All clinical assignments at SBU and its affiliated clinical sites involve contractual agreements with the facilities. ATS will be notified four weeks in advance of their clinical assignment for the upcoming clinical course. All ATS will be assigned at least one off-campus clinical assignment during the course of the program.

DRESS CODE

The Athletic Training Program at Stony Brook University promotes an environment in which all staff display the highest levels of respect and professionalism which will foster an educational environment that is consistent with learning and development of professional practice in athletic training. This policy applies to conduct during, and related to, all assigned clinical experiences of the ATP. An ATS entering the field upon graduation must understand that professional appearance as a health care provider is crucial to the development of respect and patient confidence. The ATS is expected to dress accordingly at all times. This dress code is designed to provide the minimum acceptable level of dress for the ATS during his or her assigned clinical experiences. Please note that the preceptor or the clinical setting may require the ATS to dress at a level above this dress code, but may not be less stringent. It may become necessary for the ATS to pack appropriate attire in a bag, go to classes, and change clothes in the locker room before reporting to the clinical assignment. The ATS is financially responsible for meeting dress code requirements.
ATP Dress Code

1. SHTM-issued identification badge must be worn at all times.
2. Fanny packs must be worn when at practices or events and be immediately accessible when indoors.
3. Grooming:
   ○ Hair must not interfere with ability to perform clinical duties (ie: long hair must be pulled back away from face, etc).
   ○ Finger nails must be kept at a length that will not leave imprints on patient’s skin.
4. Jewelry
   ○ Digital wrist watch or watch with a second hand must be worn at all times.
   ○ Jewelry must not interfere with any functions that may be performed by an athletic trainer (e.g. lip piercing may interfere with rescue breathing, large hoop earrings may interfere with auscultations, etc).
5. Pants/Slacks/Shorts
   ○ No Denim (any color!).
   ○ Must be properly fitted – not too loose and not too tight.
   ○ No casual cotton/lycra/spandex sweatpants/pants - nylon with pockets is acceptable.
   ○ Solid khaki, tan, brown, black, blue, gray, or white pants or shorts.
   ○ Must have a hem (no cutoffs) and pockets.
   ○ Must be in good condition (clean, free of holes, pressed).
   ○ Shorts may be worn in warm weather (with Preceptor permission at contests).
   ○ Shorts must be of mid-thigh length to knee length (No capris).
   ○ No athletic shorts (mesh, cotton, etc.).
6. Shirts
   ○ ATS must have sufficient supply of SB logo polo’s & T-shirts to wear during clinical experience.
   ○ Acceptable colors are: red, white, navy, grey.
   ○ Contest attire must be red AT polo shirt.
   ○ Shirts must be tucked into the waistline of the shorts or pants at all times.
   ○ No tank tops, sleeveless shirts, V-neck shirts, scoop-neck shirts allowed.
   ○ Shirt sleeves cannot be rolled up above the shoulder.
7. Shoes/Sneakers/Socks
   ○ The ATS must wear footwear appropriate to the setting.
   ○ Sandals, flip-flops, slides, crocs or high heel shoes are not permitted.
   ○ Socks must be worn at all times.
8. Outerwear/Hats
   ○ Only sweatshirts may be worn indoors; jackets are not permissible indoors.
   ○ Sweatshirts must represent SBU.
   ○ Hats may only be worn outdoors and must be specific to the institution (SB logo).
   ○ Hats must be worn correctly (e.g. baseball hats must be worn with the brim forward, etc.).
9. Game Day Dress
   ○ Staff polo shirt (visible); if you need to wear a turtleneck or long sleeve undergarment it must be white or grey and under the polo.
   ○ Khaki pants.
   ○ Shorts may be worn in warm weather for baseball & softball (with Preceptor permission)
   ○ Outerwear (sweatshirt, jacket, etc) must be red.
   ○ Grey staff sweatshirt is acceptable.
   ○ Everyone must be dressed in the same attire.
   ○ Exceptions will be made for extreme rain and cold weather gear (with Preceptors permission)

10. For indoor sports, dress code will be at the discretion of the Preceptor. ATS are not permitted to wear any clothing representing another University, alcohol or any other inappropriate logo/message while representing the ATP in an official capacity.

11. If clothing is deemed unacceptable by a Preceptor:

12. First offense: ATS will be sent home to change

CLINICAL EXPENSES (Appendix F)

There are a number of expenses related to the clinical experience. All expenses related to the clinical experience are the responsibility of the ATS.

1. Liability Insurance
2. Fingerprinting
3. Clothing
4. E*Value
5. Health Forms
6. NATA student membership
7. Housing

TRANSPORTATION

During your clinical experience, you will be assigned to clinical rotations on and off campus. Additionally, you will be off-campus for the majority of your general medical experience during the second semester of your senior year. All students are responsible for securing their own transportation to/from their clinical site. This includes cost as well as access to an automobile as many clinical sites are not in close proximity to public transportation.

OUTSIDE EMPLOYMENT

The clinical experience is demanding of the ATS time. The clinical experience must be the students’ first priority as part of coursework. Absences from assigned clinical experiences due to outside employment will not be tolerated and may result in dismissal from the ATP.
FORMS AND CLEARANCE

Prior to attending the clinical experience, the student must submit current documentation of the following:
1. Health assessment & technical standards
2. CPR/AED certification card
3. Proof of liability insurance
4. OSHA training documentation
5. HIPAA training documentation
6. Immunization record, including titers
7. Background check/ fingerprint processing
8. E*Value Receipt

All completed forms should be submitted in a timely manner. The ATP office is not responsible for providing copies of these documents should an ATS need a copy for personal use.

DOCUMENTATION OF CLINICAL EXPERIENCE

The ATS is responsible for recording his or her clinical hours and experiences daily. All hours will be documented in E*Value. Preceptors will verify the hours an ATS works at least one time per week.

CLINICAL EXPERIENCE EVALUATIONS

Each ATS will be evaluated by their assigned preceptor at least twice during the assignment. The ATS will evaluate their preceptors and clinical sites each semester. All evaluation tools are located on E*Value.

CLINICAL GRIEVANCES

Occasionally students encounter challenging situations during clinical rotations. While such instances are quite rare, these situations may require resolution by faculty or administration. These situations may involve clinical instructors, preceptors, patients/clients, clinical staff, other students, supervisors, academic faculty or any individual you may come in contact with during clinical rotations

POLICY

SHTM believes that the prompt resolution of challenging situations is instrumental in the restoration of a healthy learning environment, and chooses to address such situations in a proactive manner to achieve a favorable solution. Our process examines individual or shared needs to resolve the situation.
PROCEDURE

Students should reach out to the clinical coordinator of their program if they need assistance in approaching challenging situations in the clinical environment. Resolution begins with the immediate parties involved. It is the student’s responsibility to actively seek a resolution by approaching the other individual(s) involved and verbalizing the nature of the situation. If the situation is unable to be resolved by the student, then the clinical coordinator will assist with the resolution.

The Assistant Dean for Academic and Student Affairs is available to speak with the student and the faculty as needed. The SHTM Clinical Education Committee can hear clinical grievances and arbitrate should the program be unable to do so independently. Students are referred to the SHTM Academic Policies and Procedures for other academic related issues.
(See Report of Student Conference Form- Appendix G or Grievance Report- Appendix H)

MEDICATION

All ATS are never allowed to dispense over-the-counter (OTC) or prescription medications to anyone at any clinical site at any time.
ATHLETIC TRAINING STUDENT GUIDELINES

ATS are obliged to follow guidelines put forth by the ATP relating to the performance of their tasks. ATS are expected to follow these parameters as closely as possible. The following are cornerstones to a successful educational experience.

AVAILABILITY
♦ The ATS is not to leave the clinical assignment without permission from the preceptor.
♦ Personal appointments (including employment) should not interfere with your clinical assignment.
♦ When unable to make a scheduled experience notify your preceptor in advance.

PUNCTUALITY
♦ It is good practice to arrive ten minutes before all assigned clinical experiences.
♦ Be ready to begin the experience upon entering the facility.
♦ When anticipating a late arrival, call as soon as possible.
♦ The ATP rule to punctuality: “To be early is to be on time, to be on time is to be late, and to be late is unacceptable.”

ACADEMICS
♦ ATS are responsible for providing their preceptor with a finalized class schedule each semester.
♦ Any changes to a completed schedule must be reported as soon as possible.
♦ ATS must remain in good academic standing.
♦ ATS who fall behind in their academics may be subject to suspension and/or dismissal from the ATP.
CLINICAL COURSES

There are six clinical courses (HAL 581-586) that provide a logical progression of increasingly complex and autonomous patient-care and client-care experiences. Clinical education will include clinical practice opportunities with varied client/patient populations throughout the lifespan with varied sexes, socioeconomic status, levels of activity, and athletic ability. Students will also have opportunities to work with populations who participate in non-athletic activities.

AT Clinical I commences in the fall of year I and includes evidence based principles and foundations of athletic training as well as the clinical diagnosis and treatment of lower extremity injuries. In the spring of year I AT clinical II will expand on that knowledge by including the skills learned in critical care and clinical and diagnosis and treatment of injuries to the upper extremity and cervical spine.

AT Clinical III occurs during summer II of year II, and is the first immersive clinical. An athletic training immersive clinical is a practice-intensive experience that allows the student to experience the totality of care provided by athletic trainers. Students will participate in the day-to-day and week-to-week role of an athletic trainer. This clinical experience will build on the previous two clinical courses as students will practice skills associated with the thoracic and lumbosacral spine and introduce advanced therapeutic intervention techniques into their clinical practice. These skills will continue into AT clinical IV in the fall of year II allowing students to advance their clinical skills in all of the previously studied areas.

AT Clinical V & VI occur during spring of year II, and are also immersive clinical experiences with a focus on general medical conditions, nutrition & supplements. The goal of this last experience is to encourage students to develop critical thinking skills and increased autonomy in making clinical decisions.

These courses earn college credits for ATS who are on clinical placements. Below presents the stipulations and limitations placed on the clinical courses.

- Clinical credit may only be obtained during semesters in which the ATS is enrolled in the ATP.
- The ATS may only earn credit for the assigned clinical course during any given semester.
- Each ATS is expected to attend the clinical experience for no more than six consecutive days per week which might include weekend days.
- All clinical education must be contained in individual courses that are completed over a minimum of two academic years. Clinical education may begin prior to or extend beyond the institution’s academic calendar.
- An ATS receiving less than a grade of “C” in any clinical course may be dismissed from the program.

Each clinical course is proficiency-based, which means that a large percentage of an ATS final grade will be based on their ability to perform a series of set objectives taken from the incorporation of theory and practice of content learned in previous coursework. This method should help ATS tie together what they learn in the classroom with the clinical aspects of athletic training. For this process to be effective,
ATS should approach the content of the Clinical Skill and Professional Attribute Evaluation as an ongoing task, starting with the first day of their assignment. Waiting until the last few days of their assignment and attempting to do it then does not meet the intent of the clinical experience and is unfair to their preceptor, who has the right to decline the imposition on their time. In this case, ATS should expect to receive a failing grade for their clinical. All of the required proficiencies for each clinical are divided into skill proficiencies and scored 0-10. Each proficiency must be completed with a score of 7 or higher before the student is considered to be proficient.

Credit for AT clinical courses is based on a formula developed by the State University of New York (SUNY) and is applicable system-wide for all laboratory and clinical courses. The formula takes into account the amount of time the student is expected to be involved in activity required by the course. This includes in-class and clinical experience (out-of-class) over the duration of the respective course. Clinical course taken during the fall (HAL 482, 485) and spring (HAL 483, 486) semesters earn the ATS 7 credit hours. Clinical courses taken during the summer modules (HAL 481 and 484) earn the ATS a variable amount of credit hours (3-5) based on the length on the applicable preseason schedule.

**Proficiency = Able to perform a task achieving the desired outcome for the ATS academic rank.**

The preceptor will also provide objective and subjective feedback regarding the professional attributes and professional ethics of the ATS. The objective measures to be considered are primacy of the patient, teemed approach to practice, legal practice, ethical practice, advancing knowledge, cultural competence, and professionalism.

The following are the criteria for all components of the Clinical Skill & Professional Practice Attribute Evaluation

<table>

ATHLETIC TRAINING STUDENT CONDUCT

Students are required to abide by all of the rules and regulations set forth by the program, department, college and university. To ensure that you are aware of your rights and responsibilities as well as the expectations placed on you, make sure that you are in possession of the following documents:

- Athletic Training Program Policy and Procedure Manual (this document)
- School of Health Technology and Management Student Orientation Handbook (SHTM new student web site and AT Majors Blackboard community page)
- Health Sciences Bulletin [https://www.stonybrook.edu/hsbulletin/](https://www.stonybrook.edu/hsbulletin/)
- University Community Standards [https://www.stonybrook.edu/commcms/studentaffairs/ucs/](https://www.stonybrook.edu/commcms/studentaffairs/ucs/)

Students are required to conduct themselves professionally as an athletic training student and future AT professional. Therefore, National Athletic Trainers’ Association (NATA) Code of Ethics Board of Certification (BOC) Standards of Professional Practice must be adhered to.

Students must also abide by the policies and procedures and code of conduct at the affiliated clinical site to which they are assigned. Their preceptor is responsible for reviewing this information with the student.

Students are expected to be professional at all times, as they represent Stony Brook University, the School of Health Technology and Management, the Athletic Training Program, the Athletic Training profession and themselves.

Discretion should be used in identifying yourselves as athletic training students either verbally or with labels on clothing in places where alcohol or other substances can be consumed.

Violations of any of these policies, procedures or codes will result in documented action by the ATP in the form of an ATS Incident Report (Appendix E) or Report of Student Conference (Appendix G). These violations can include: unexcused absence, inappropriate behavior, insubordination, unethical conduct, or any other conduct unbecoming of an athletic training students as mentioned in the policies, procedures or codes mentioned. Violations can result in development of a behavioral contract, probation, failure of course requiring repeat of course, additional semester(s), and/or dismissal from ATP.
APPENDIX A

Commission on Accreditation of Athletic Training Education
2020 Standards for Accreditation of Professional Athletic Training Programs
Master’s Degree Programs
Adoption date: January 9, 2018
Effective date: July 1, 2020
Last updated: July 2019

SECTION IV: CURRICULAR CONTENT

Prerequisite Coursework and Foundational Knowledge

Standard 54 The professional program requires prerequisite classes in biology, chemistry, physics, psychology, anatomy, and physiology at the postsecondary level.

Standard 55 Students must gain foundational knowledge in statistics, research design, epidemiology, pathophysiology, biomechanics and pathomechanics, exercise physiology, nutrition, human anatomy, pharmacology, public health, and health care delivery and payor systems.

The professional program content will prepare the graduate to do the following:

Core Competencies

Core Competencies: Patient-Centered Care

Standard 56 Advocate for the health needs of clients, patients, communities, and populations.

Standard 57 Identify health care delivery strategies that account for health literacy and a variety of social determinants of health.

Standard 58 Incorporate patient education and self-care programs to engage patients and their families and friends to participate in their care and recovery.

Standard 59 Communicate effectively and appropriately with clients/patients, family members, coaches, administrators, other health care professionals, consumers, payors, policy makers, and others.

Standard 60 Use the International Classification of Functioning, Disability, and Health (ICF) as a framework for delivery of patient care and communication about patient care.

Core Competencies: Interprofessional Practice and Interprofessional Education

Standard 61 Practice in collaboration with other health care and wellness professionals.

Core Competencies: Evidence-Based Practice

Standard 62 Provide athletic training services in a manner that uses evidence to inform practice.
Core Competencies: Quality Improvement

Standard 63 Use systems of quality assurance and quality improvement to enhance client/patient care.

Core Competencies: Health Care Informatics

Standard 64 Apply contemporary principles and practices of health informatics to the administration and delivery of patient care, including (but not limited to) the ability to do the following:
- Use data to drive informed decisions
- Search, retrieve, and use information derived from online databases and internal databases for clinical decision support
- Maintain data privacy, protection, and data security
- Use medical classification systems (including International Classification of Disease codes) and terminology (including Current Procedural Terminology)
- Use an electronic health record to document, communicate, and manage health-related information; mitigate error; and support decision making.

Core Competencies: Professionalism

Standard 65 Practice in a manner that is congruent with the ethical standards of the profession.

Standard 66 Practice health care in a manner that is compliant with the BOC Standards of Professional Practice and applicable institutional/organizational, local, state, and federal laws, regulations, rules, and guidelines. Applicable laws and regulations include (but are not limited to) the following:
- Requirements for physician direction and collaboration
- Mandatory reporting obligations
- Health Insurance Portability and Accountability Act (HIPAA)
- Family Education Rights and Privacy Act (FERPA)
- Universal Precautions/OSHA Bloodborne Pathogen Standards
- Regulations pertaining to over-the-counter and prescription medications

Standard 67 Self-assess professional competence and create professional development plans according to personal and professional goals and requirements.

Standard 68 Advocate for the profession.

Patient/Client Care

Standard 69 Develop a care plan for each patient. The care plan includes (but is not limited to) the following:
- Assessment of the patient on an ongoing basis and adjustment of care accordingly
- Collection, analysis, and use of patient-reported and clinician-rated outcome measures to improve patient care
- Consideration of the patient’s goals and level of function in treatment decisions
- Discharge of the patient when goals are met or the patient is no longer making progress
- Referral when warranted

Examination, Diagnosis, and Intervention

Standard 70 Evaluate and manage patients with acute conditions, including triaging conditions that are life threatening or otherwise emergent. These include (but are not limited to) the following conditions:
• Cardiac compromise (including emergency cardiac care, supplemental oxygen, suction, adjunct airways, nitroglycerine, and low-dose aspirin)
• Respiratory compromise (including use of pulse oximetry, adjunct airways, supplemental oxygen, spirometry, meter-dosed inhalers, nebulizers, and bronchodilators)
• Conditions related to the environment: lightning, cold, heat (including use of rectal thermometry)
• Cervical spine compromise
• Traumatic brain injury
• Internal and external hemorrhage (including use of a tourniquet and hemostatic agents)
• Fractures and dislocations (including reduction of dislocation)
• Anaphylaxis (including administering epinephrine using automated injection device)
• Exertional sickling, rhabdomyolysis, and hyponatremia
• Diabetes (including use of glucometer, administering glucagon, insulin)
• Drug overdose (including administration of rescue medications such as naloxone)
• Wounds (including care and closure)
• Testicular injury
• Other musculoskeletal injuries

Standard 71 Perform an examination to formulate a diagnosis and plan of care for patients with health conditions commonly seen in athletic training practice. This exam includes the following:
• Obtaining a medical history from the patient or other individual
• Identifying comorbidities and patients with complex medical conditions
• Assessing function (including gait)
• Selecting and using tests and measures that assess the following, as relevant to the patient’s clinical presentation:
  o Cardiovascular system (including auscultation)
  o Endocrine system
  o Eyes, ears, nose, throat, mouth, and teeth
  o Gastrointestinal system
  o Genitourinary system
  o Integumentary system
  o Mental status
  o Musculoskeletal system
  o Neurological system
  o Pain level
  o Reproductive system
  o Respiratory system (including auscultation)
  o Specific functional tasks
• Evaluating all results to determine a plan of care, including referral to the appropriate provider when indicated

Standard 72 Perform or obtain the necessary and appropriate diagnostic or laboratory tests—including (but not limited to) imaging, blood work, urinalysis, and electrocardiogram—to facilitate diagnosis, referral, and treatment planning.

Standard 73 Select and incorporate interventions (for pre-op patients, post-op patients, and patients with nonsurgical conditions) that align with the care plan. Interventions include (but are not limited to) the following:
• Therapeutic and corrective exercise
• Joint mobilization and manipulation
• Soft tissue techniques
• Movement training (including gait training)
• Motor control/proprioceptive activities
• Task-specific functional training
- Therapeutic modalities
- Home care management
- Cardiovascular training

**Standard 74** Educate patients regarding appropriate pharmacological agents for the management of their condition, including indications, contraindications, dosing, interactions, and adverse reactions.

**Standard 75** Administer medications or other therapeutic agents by the appropriate route of administration upon the order of a physician or other provider with legal prescribing authority.

**Standard 76** Evaluate and treat a patient who has sustained a concussion or other brain injury, with consideration of established guidelines:
- Performance of a comprehensive examination designed to recognize concussion or other brain injury, including (but not limited to) neurocognitive evaluation, assessment of the vestibular and vision systems, cervical spine involvement, mental health status, sleep assessment, exertional testing, nutritional status, and clinical interview
- Re-examination of the patient on an ongoing basis
- Recognition of an atypical response to brain injury
- Implementation of a plan of care (addressing vestibular and oculomotor disturbance, cervical spine pain, headache, vision, psychological needs, nutrition, sleep disturbance, exercise, academic and behavioral accommodations, and risk reduction)
- Return of the patient to activity/participation
- Referral to the appropriate provider when indicated

**Standard 77** Identify, refer, and give support to patients with behavioral health conditions. Work with other health care professionals to monitor these patients' treatment, compliance, progress, and readiness to participate.

**Standard 78** Select, fabricate, and/or customize prophylactic, assistive, and restrictive devices, materials, and techniques for incorporation into the plan of care, including the following:
- Durable medical equipment
- Orthotic devices
- Taping, splinting, protective padding, and casting

**Prevention, Health Promotion, and Wellness**

**Standard 79** Develop and implement strategies to mitigate the risk for long-term health conditions across the lifespan. These include (but are not limited to) the following conditions:
- Adrenal diseases
- Cardiovascular disease
- Diabetes
- Neurocognitive disease
- Obesity
- Osteoarthritis

**Standard 80** Develop, implement, and assess the effectiveness of programs to reduce injury risk.

**Standard 81** Plan and implement a comprehensive preparticipation examination process to affect health outcomes.

**Standard 82** Develop, implement, and supervise comprehensive programs to maximize sport performance that are safe and specific to the client’s activity.

**Standard 83** Educate and make recommendations to clients/patients on fluids and nutrients to ingest prior to
activity, during activity, and during recovery for a variety of activities and environmental conditions.

Standard 84 Educate clients/patients about the effects, participation consequences, and risks of misuse and abuse of alcohol, tobacco, performance-enhancing drugs/substances, and over-the-counter, prescription, and recreational drugs.

Standard 85 Monitor and evaluate environmental conditions to make appropriate recommendations to start, stop, or modify activity in order to prevent environmental illness or injury.

Standard 86 Select, fit, and remove protective equipment to minimize the risk of injury or re-injury.

Standard 87 Select and use biometrics and physiological monitoring systems and translate the data into effective preventive measures, clinical interventions, and performance enhancement.

Health Care Administration

Standard 88 Perform administrative duties related to the management of physical, human, and financial resources in the delivery of health care services. These include (but are not limited to) the following duties:
  • Strategic planning and assessment
  • Managing a physical facility that is compliant with current standards and regulations
  • Managing budgetary and fiscal processes
  • Identifying and mitigating sources of risk to the individual, the organization, and the community
  • Navigating multipayer insurance systems and classifications
  • Implementing a model of delivery (for example, value-based care model)

Standard 89 Use a comprehensive patient-file management system (including diagnostic and procedural codes) for documentation of patient care and health insurance management.

Standard 90 Establish a working relationship with a directing or collaborating physician.

Standard 91 Develop, implement, and revise policies and procedures to guide the daily operation of athletic training services.

Standard 92 Develop, implement, and revise policies that pertain to prevention, preparedness, and response to medical emergencies and other critical incidents.

Standard 93 Develop and implement specific policies and procedures for individuals who have sustained concussions or other brain injuries, including the following:
  • Education of all stakeholders
  • Recognition, appraisal, and mitigation of risk factors
  • Selection and interpretation of baseline testing
  • Agreement on protocols to be followed, including immediate management, referral, and progressive return to activities of daily living, including school, sport, occupation, and recreation

Standard 94 Develop and implement specific policies and procedures for the purposes of identifying patients with behavioral health problems and referring patients in crisis to qualified providers.
APPENDIX B

NATA CODE OF ETHICS
Revised 2018

Preamble
The National Athletic Trainers’ Association Code of Ethics states the principles of ethical behavior that should be followed in the practice of athletic training. It is intended to establish and maintain high standards and professionalism for the athletic training profession. The principles do not cover every situation encountered by the practicing athletic trainer, but are representative of the spirit with which athletic trainers should make decisions. The principles are written generally; the circumstances of a situation will determine the interpretation and application of a given principle and of the Code as a whole. When a conflict exists between the Code and the law, the law prevails.

1. MEMBERS SHALL PRACTICE WITH COMPASSION, RESPECTING THE RIGHTS, WELL-BEING, AND DIGNITY OF OTHERS
1.1 Members shall render quality patient care regardless of the patient’s race, religion, age, sex, ethnic or national origin, disability, health status, socioeconomic status, sexual orientation, or gender identity.

1.2. Member’s duty to the patient is the first concern, and therefore members are obligated to place the well-being and long-term well-being of their patient above other groups and their own self-interest, to provide competent care in all decisions, and advocate for the best medical interest and safety of their patient at all times as delineated by professional statements and best practices.

1.3. Members shall preserve the confidentiality of privileged information and shall not release or otherwise publish in any form, including social media, such information to a third party not involved in the patient’s care without a release unless required by law.

2. MEMBERS SHALL COMPLY WITH THE LAWS AND REGULATIONS GOVERNING THE PRACTICE OF ATHLETIC TRAINING, NATIONAL ATHLETIC TRAINERS’ ASSOCIATION (NATA) MEMBERSHIP STANDARDS, AND THE NATA CODE OF ETHICS
2.1. Members shall comply with applicable local, state, federal laws, and any state athletic training practice acts.

2.2. Members shall understand and uphold all NATA Standards and the Code of Ethics.

2.3. Members shall refrain from, and report illegal or unethical practices related to athletic training.

2.4. Members shall cooperate in ethics investigations by the NATA, state professional licensing/regulatory boards, or other professional agencies governing the athletic training profession. Failure to fully cooperate in an ethics investigation is an ethical violation.
2.5. Members must not file, or encourage others to file, a frivolous ethics complaint with any organization or entity governing the athletic training profession such that the complaint is unfounded or willfully ignore facts that would disprove the allegation(s) in the complaint.

2.6. Members shall refrain from substance and alcohol abuse. For any member involved in an ethics proceeding with NATA and who, as part of that proceeding is seeking rehabilitation for substance or alcohol dependency, documentation of the completion of rehabilitation must be provided to the NATA Committee on Professional Ethics as a requisite to complete a NATA membership reinstatement or suspension process.

3. MEMBERS SHALL MAINTAIN AND PROMOTE HIGH STANDARDS IN THEIR PROVISION OF SERVICES

3.1. Members shall not misrepresent, either directly or indirectly, their skills, training, professional credentials, identity, or services.

3.2. Members shall provide only those services for which they are qualified through education or experience and which are allowed by the applicable state athletic training practice acts and other applicable regulations for athletic trainers.

3.3. Members shall provide services, make referrals, and seek compensation only for those services that are necessary and are in the best interest of the patient as delineated by professional statements and best practices.

3.4. Members shall recognize the need for continuing education and participate in educational activities that enhance their skills and knowledge and shall complete such educational requirements necessary to continue to qualify as athletic trainers under the applicable state athletic training practice acts.

3.5. Members shall educate those whom they supervise in the practice of athletic training about the Code of Ethics and stress the importance of adherence.

3.6. Members who are researchers or educators must maintain and promote ethical conduct in research and educational activities.

4. MEMBERS SHALL NOT ENGAGE IN CONDUCT THAT COULD BE CONSTRUED AS A CONFLICT OF INTEREST, REFLECTS NEGATIVELY ON THE ATHLETIC TRAINING PROFESSION, OR JEOPARDIZES A PATIENT’S HEALTH AND WELL-BEING.

4.1. Members should conduct themselves personally and professionally in a manner that does not compromise their professional responsibilities or the practice of athletic training.

4.2. All NATA members, whether current or past, shall not use the NATA logo or AT logo in the endorsement of products or services, or exploit their affiliation with the NATA in a manner that reflects badly upon the profession.

4.3. Members shall not place financial gain above the patient’s well-being and shall not participate in any arrangement that exploits the patient.
4.4. Members shall not, through direct or indirect means, use information obtained in the course of the practice of athletic training to try and influence the score or outcome of an athletic event, or attempt to induce financial gain through gambling.

4.5. Members shall not provide or publish false or misleading information, photography, or any other communications in any media format, including on any social media platform, related to athletic training that negatively reflects the profession, other members of the NATA, NATA officers, and the NATA office
APPENDIX C

BOC Standards of Professional Practice

*Implemented January 1, 2018*

**Introduction**

The BOC Standards of Professional Practice is reviewed by the Board of Certification, Inc. (BOC) Standards Committee and recommendations are provided to the BOC Board of Directors. The BOC Standards Committee is comprised of 5 Athletic Trainer members and 1 Public member. The BOC Board of Directors approves the final document. The BOC Board of Directors includes 6 Athletic Trainer Directors, 1 Physician Director, 1 Public Director and 1 Corporate/ Educational Director.

The BOC certifies Athletic Trainers (ATs) and identifies, for the public, quality healthcare professionals through a system of certification, adjudication, standards of practice and continuing competency programs. ATs are healthcare professionals who collaborate with physicians to optimize activity and participation of patients and clients. Athletic training encompasses the prevention, diagnosis and intervention of emergency, acute and chronic medical conditions involving impairment, functional limitations and disabilities.

The BOC is the only accredited certification program for Athletic Trainers in the United States. Every 5 years, the BOC must undergo review and re-accreditation by the National Commission for Certifying Agencies (NCCA). The NCCA is the accreditation body of the Institute of Credentialing Excellence.

The BOC Standards of Professional Practice consists of 2 sections:
I. Practice Standards
II. Code of Professional Responsibility

**I. Practice Standards**

**Preamble**

The primary purpose of the Practice Standards is to establish essential duties and obligations imposed by virtue of holding the ATC® credential. Compliance with the Practice Standards is mandatory. The BOC does not express an opinion on the competence or warrant job performance of credential holders; however, every Athletic Trainer and applicant must agree to comply with the Practice Standards at all times.

**Standard 1: Direction**

The Athletic Trainer renders service or treatment under the direction of, or in collaboration with a physician, in accordance with their training and the state’s statutes, rules and regulations.

**Standard 2: Prevention**

The Athletic Trainer implements measures to prevent and/or mitigate injury, illness and long term disability.
Standard 3: Immediate Care
The Athletic Trainer provides care procedures used in acute and/or emergency situations, independent of setting.

Standard 4: Examination, Assessment and Diagnosis
The Athletic Trainer utilizes patient history and appropriate physical examination process

Standard 5: Therapeutic Intervention
The Athletic Trainer determines appropriate treatment, rehabilitation and/or reconditioning strategies. Intervention program objectives include long and short-term goals and an appraisal of those which the patient can realistically be expected to achieve from the program. Appropriate patient-centered outcomes assessments are utilized to document efficacy of interventions.

Standard 6: Program Discontinuation
The Athletic Trainer may recommend discontinuation of the intervention program at such time the patient has received optimal benefit of the program. A final assessment of the patients’ status is included in the discharge note.

Standard 7: Organization and Administration
The Athletic Trainer documents all procedures and services in accordance with local, state and federal laws, rules and guidelines.

II. Code of Professional Responsibility

Preamble
The Code of Professional Responsibility (Code) mandates that BOC credential holders and applicants act in a professionally responsible manner in all athletic training services and activities. The BOC requires all Athletic Trainers and applicants to comply with the Code. The BOC may discipline, revoke or take other action with regard to the application or certification of an individual that does not adhere to the Code. The Professional Practice and Discipline Guidelines and Procedures may be accessed via the BOC website, www.bocatc.org.

Code 1: Patient Care Responsibilities
The Athletic Trainer or applicant:
1.1 Renders quality patient care regardless of the patient’s age, gender, race, religion, disability, sexual orientation, or any other characteristic protected by law
1.2 Protects the patient from undue harm and acts always in the patient’s best interests and is an advocate for the patient’s welfare, including taking appropriate action to protect patients from healthcare providers or athletic training students who are, impaired or engaged in illegal or unethical practice
1.3 Demonstrates sound clinical judgment that is based upon current knowledge, evidence-based guidelines and the thoughtful and safe application of resources, treatments and therapies

1.4 Communicates effectively and truthfully with patients and other persons involved in the patient's program, while maintaining privacy and confidentiality of patient information in accordance with applicable law
   1.4.1 Demonstrates respect for cultural diversity and understanding of the impact of cultural and religious values

1.5 Develops and maintains a relationship of trust and confidence with the patient and/or the parent/guardian of a minor patient and does not exploit the relationship for personal or financial gain

1.6 Does not engage in intimate or sexual activity with a patient and/or the parent/guardian of a minor patient

1.7 Informs the patient and/or the parent/guardian of a minor patient of any risks involved in the treatment plan
   1.7.1 Does not make unsupported claims about the safety or efficacy of treatment

**Code 2: Competency**

The Athletic Trainer or applicant:

2.1 The Athletic Trainer or applicant: Engages in lifelong, professional and continuing educational activities to promote continued competence

2.2 Complies with the most current BOC recertification policies and requirements

**Code 3: Professional Responsibility**

The Athletic Trainer or applicant:

3.1 Practices in accordance with the most current BOC Practice Standards

3.2 Practices in accordance with applicable local, state and/or federal rules, requirements, regulations and/or laws related to the practice of athletic training

3.3 Practices in collaboration and cooperation with others involved in a patient’s care when warranted; respecting the expertise and medico-legal responsibility of all parties

3.4 Provides athletic training services only when there is a reasonable expectation that an individual will benefit from such services

3.5 Does not misrepresent in any manner, either directly or indirectly, their skills, training, professional credentials, identity or services or the skills, training, credentials, identity or services of athletic training
   3.5.1 Provides only those services for which they are prepared and permitted to perform by applicable local, state and/or federal rules, requirements, regulations and/or laws related to the practice of athletic training

3.6 Does not guarantee the results of any athletic training service

3.7 Complies with all BOC exam eligibility requirements

3.8 Ensures that any information provided to the BOC in connection with exam eligibility, certification recertification or reinstatement including but not limited to, exam applications, reinstatement applications or continuing education forms, is accurate and truthful
3.9 Does not possess, use, copy, access, distribute or discuss certification exams, self-assessment and practice exams, score reports, answer sheets, certificates, certificant or applicant files, documents or other materials without proper authorization

3.10 Takes no action that leads, or may lead, to the conviction, plea of guilty or plea of nolo contendere (no contest) to any felony or to a misdemeanor related to public health, patient care, athletics or education; this includes, but is not limited to: rape; sexual abuse or misconduct; actual or threatened use of violence; the prohibited sale or distribution of controlled substances, or the possession with intent to distribute controlled substances; or improper influence of the outcome or score of an athletic contest or event

3.11 Reports any suspected or known violation of applicable local, state and/or federal rules, requirements, regulations and/or laws by him/herself and/or by another Athletic Trainer that is related to the practice of athletic training

3.12 Reports any criminal convictions (with the exception of misdemeanor traffic offenses or traffic ordinance violations that do not involve the use of alcohol or drugs) and/or professional suspension, discipline or sanction received by him/herself or by another Athletic Trainer that is related to athletic training

3.13 Cooperates with BOC investigations into alleged illegal or unethical activities. Cooperation includes, but is not limited to, providing candid, honest and timely responses to requests for information

3.14 Complies with all confidentiality and disclosure requirements of the BOC and existing law

3.15 Does not endorse or advertise products or services with the use of, or by reference to, the BOC name without proper authorization

3.16 Complies with all conditions and requirements arising from certification restrictions or disciplinary actions taken by the BOC, including, but not limited to, conditions and requirements contained in decision letters and consent agreements entered into pursuant to Section 4 of the BOC Professional Practice and Discipline Guidelines and Procedures.

**Code 4: Research**

The Athletic Trainer or applicant who engages in research:

4.1 Conducts research according to accepted ethical research and reporting standards established by public law, institutional procedures and/or the health professions

4.2 Protects the human rights and well-being of research participants

4.3 Conducts research activities intended to improve knowledge, practice, education, outcomes and/or public policy relative to the organization and administration of health systems and/or healthcare delivery

**Code 5: Social Responsibility**

The Athletic Trainer or applicant:

5.1 Strives to serve the profession and the community in a manner that benefits society at large

5.2 Advocates for appropriate health care to address societal health needs and goals
**Code 6: Business Practices**

The Athletic Trainer or applicant:

6.1  Does not participate in deceptive or fraudulent business practices
6.2  Seeks remuneration only for those services rendered or supervised by an AT; does not charge for services not rendered
   6.2.1 Provides documentation to support recorded charges
   6.2.2 Ensures all fees are commensurate with services rendered
6.3  Maintains adequate and customary professional liability insurance
6.4  Acknowledges and mitigates conflicts of interest
APPENDIX D

KEYS TO SUCCESSFUL CLINICAL EDUCATION

1. Take advantage of this unique opportunity. This is the time to incorporate what you have learned in the classroom and laboratory to the clinical environment.

2. Challenge yourself to improve on a daily basis. Do not accept mediocrity.

3. Communication is the key to success. Establish open lines with your preceptor, other preceptors, your classmates, coaches, administrators, and your faculty.

4. Be ready to become actively involved once you arrive at your clinical site.

5. Take initiative. Be proactive. Take ownership of your learning. Avoid being prompted to seize an opportunity or a teachable/learning moment.

6. Be open to the new and different. There are many ways to arrive at the desired outcome. Embrace different styles and develop an understanding as to why they were done. If unsure, ASK.

7. You should be your preceptor’s shadow. Observe and listen to all interactions your preceptor has with physicians, parents, student-athletes, patients, coaches, and administrators. Good listening and observation skills go a long way. There is no substitute for your ears and your eyes. Ask questions. Engage.

8. Take advantage of “down time.” This is an opportunity to practice skills, read ahead, and continue your learning.

9. You must be supervised by a preceptor at all times. A preceptor may be an AT, physician, physical therapist, or other allied health profession. They must be in proximity so that they can intervene on the behalf of the athlete/patient. If you feel that you are being unsupervised, immediately call the Clinical Coordinator at (631) 632-7255 (office) or (631) 889-0215 (cell).

10. If you encounter any problems/incidents at your clinical site, notify the Clinical Coordinator within 24 hours of the occurrence.

What you do is a reflection on the University, the School of Health Technology and Management, and the Athletic Training Program. Every day is a potential job interview. Be responsible and mature. Poor attitude and inappropriate conduct will not be tolerated.
APPENDIX E

ATHLETIC TRAINING PROGRAM
STONY BROOK UNIVERSITY
ATHLETIC TRAINING STUDENT INCIDENT REPORT

Athletic Training Student___________________________________________ Class _______________

Preceptor_________________________________________________________ Date of Report ______

Incident Date _______________________

Check the appropriate incident box (es):

❑ Unexcused Absence
❑ Inappropriate Behavior
❑ Insubordination
❑ Unethical Conduct
❑ Other (please describe)
_________________________________________________________________
_________________________________________________________________

Procedure:

1. Preceptor/Instructor, witnessing incident, writes report (be succinct, not “he said/she said”) and signs it.
2. Preceptor/Instructor discusses incident with ATS, report is signed and placed in ATS file.
3. If Preceptor/Instructor is confident that incident is resolved, no further action taken.
4. If Preceptor/Instructor feels ATS needs to discuss further with Clinical Course Instructor, Clinical Coordinator, or Program Director a report is given to that individual and a meeting occurs.
5. Report will affect ATS course grade.

APPENDIX F
ATHLETIC TRAINING PROGRAM RELATED EXPENSES

Below you will find the projected cost for Athletic Training Students:

**Liability Insurance** – Anticipated cost is $38-$45/year

**Fingerprinting** – Anticipated cost is $100-$110/year

**Clothing** – Anticipated minimal cost is $200.00/year

**E-Value** – Anticipated cost is $200.00/year

**NATA Student Membership** – Anticipated cost is $85.00/year

**Transportation** – Cost is dependent on clinical site placement. All AT students are responsible for securing their own transportation to/from their clinical site. This includes cost as well as access to an automobile as many clinical sites are not in close proximity to public transportation.

**Health Forms** – All full time students are required to have health insurance; either through the University health insurance plan or a comparable alternate health insurance (see [http://studentaffairs.stonybrook.edu/shs/insurance/facts.shtml](http://studentaffairs.stonybrook.edu/shs/insurance/facts.shtml)).

The Health and Counseling Fee (HCF) is assessed to all students as per tuition and fee rates indicated below.

Estimated cost for required medical clearance documentation, if performed at the Student Health Service (SHS), is as follows:

- Fall/Spring Health and Counseling fees are included in tuition and fees ($176)
- Summer Session I or II HCF fee is $51 each session
- Physical examination is $40
- Annual health assessment is included in fall/spring semester tuition and summer session fees
- PPD placement is $5
- Titers (sent to an outside lab and the student’s insurance is billed) full charge is approximately $100

**Housing** – Current Campus Residence Hall Rates can be found here: [http://studentaffairs.stonybrook.edu/res/housing_facilities/rates.shtml](http://studentaffairs.stonybrook.edu/res/housing_facilities/rates.shtml)

TECHNICAL STANDARDS FOR ADMISSION

This form should have been read, signed and submitted prior to AT

New Student Orientation
(BLANK INTENTIONALLY)
The Athletic Training Program at Stony Brook University is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic trainer, as well as meet the expectations of the program’s accrediting agency (Commission on Accreditation of Athletic Training Education [CAATE]). The following abilities and expectations must be met by all students admitted to the Athletic Training Program. In the event a student is unable to fulfill these technical standards, with or without reasonable accommodation, the student will not be admitted into the program.

Compliance with the program’s technical standards does not guarantee a student’s eligibility for the BOC certification exam.

Candidates for selection to the Athletic Training Program must demonstrate:

1. The mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm;
2. Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely and efficiently use equipment and materials during the assessment and treatment of patients;
3. The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice;
4. The ability to record the physical examination results and a treatment plan clearly and accurately;
5. The capacity to maintain composure and continue to function well during periods of high stress;
6. The perseverance, diligence and commitment to complete the athletic training program as outlined and sequenced;
7. Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations;
8. Affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Candidates for selection to the Athletic Training Program will be required to verify they understand and meet these technical standards or that they believe that, with certain accommodations, they can meet the standards.
The Student Accessibility Support Center will evaluate a student who states they could meet the program’s technical standards with accommodation and confirm that the stated condition qualifies as a disability under applicable laws.

If a student states they can meet the technical standards with accommodation, then the University will determine whether it agrees that the student can meet the technical standards with reasonable accommodation; this includes a review as whether the accommodations requested are reasonable, taking into account whether accommodation would jeopardize clinician/patient safety, or the educational process of the student or the institution, including all coursework, clinical experiences and internships deemed essential to graduation.

I certify that I have read and understand the technical standards for selection listed above, and I believe to the best of my knowledge that I meet each of these standards without accommodation. I understand that if I am unable to meet these standards I will not be admitted into the program.

Alternative statement for students requesting accommodations:

I certify that I have read and understand the technical standards for selection listed above, and I believe to the best of my knowledge that I meet each of these standards with certain accommodations. I will contact the Student Accessibility Support Center to determine what accommodations may be available. I understand that if I am unable to meet these standards with or without accommodations, I will not be admitted into the program.

APPENDIX J

STATEMENT OF STUDENT AGREEMENT

Please read, sign and submit pages 73-74 at AT New Student Orientation
(BLANK INTENTIONALLY)
STONY BROOK UNIVERSITY
ATHLETIC TRAINING PROGRAM

STATEMENT OF STUDENT AGREEMENT

I have read the *Athletic Training Program Policies and Procedures Manual (ATP P&P)* and the *SHTM Student Handbook (SHTM SH)* and agree to abide by its procedures, rules and regulations. I understand that failure to meet the academic and/or clinical requirements presented in these manuals may result in my being removed from the program.

Please indicate that you have read, understand and agree to the requirements of the following sections by initialing the following statements:

**Initial**

_____ I have reviewed the ATP P&P and the SHTM SH and agree to abide by its procedures, rules and regulations.

_____ The minimum academic requirements to remain in the program including the “C or better” policy. I understand that if I receive less than a grade of “C” in any clinical course I may be dismissed from the program.

_____ I am expected to adhere to my academic plan and may not change it without the advice and consent of my academic advisor. This includes transfer courses and courses substitutions.

_____ I understand that I must purchase Student Liability Insurance.

_____ I understand that I must attain an Annual Student Health Assessment from my private practitioner or the Student Health Service.

_____ I understand that I must hold current Professional Level CPR/AED Certification (Basic Life Support) throughout each of my clinical affiliations. I understand that I am responsible for obtaining and updating this certification every two years. In addition, I must attend yearly OSHA training.

_____ I have read and understand the ATP Technical Standards requirements. I understand that if I am unable to meet the standards I will inform the program director in order to make reasonable accommodations on my behalf.
I understand that a minimum of 850 clock hours of athletic training experience is required from Stony Brook University and its affiliated sites to graduate and be eligible for NYS Certification.

I understand that I must complete a minimum of one satisfactory athletic training rotation at Stony Brook University.

I understand that during my clinical experience, I will be assigned to clinical rotations on and off campus. Additionally, I will be off-campus for the majority of my general medical experience during the second semester year two. I understand that I am responsible for securing my own transportation to/from my assigned clinical site. This includes cost as well as access to an automobile as many clinical sites are not in close proximity to public transportation.

I understand that I am responsible for all clinical expenses incurred.

I understand that I must notify the Clinical Coordinator of any possible conflicts of interest at clinical sites.

I understand that I must complete yearly HIPAA & OSHA training.

I understand that Athletic Training is a healthcare profession. Therefore, medical records are initiated and retained in the athletic training facility. I am aware that confidentiality of these records and the information that I acquire during my academic and professional duties must be maintained. At no time should there be discussion about an injury or injured student-athlete with anyone other than the athletic training staff. This includes parents, roommates, professors, administrators, the media, and others in the community. I am aware that any breach of this trust may jeopardize my ability to continue in the program.

I agree to present myself in a professional manner and demeanor and uphold the Standards of Practice established by the BOC and the National Athletic Trainers’ Association Code of Ethics.
